Windows 10 packs a slew of nifty new command line features, including—hallelujah!—the ability to copy and graste inside the command prompt with Crtl + C and CrtlCt + V. To activate the goodies, open the command prompt. Right-click its title bar, then select Properties. You can find and enable the new features under the "Edit Options" section of the Options tab.	e used for recording video evidence of your most lorious gaming moments, but it'll actually let you reate videos of any open app or desktop software hough not OS-level areas like File Explorer or the esktop). o summon it, simply press Windows key + G. A prompill ask you if you want to open the Game bar. Lie you utt off and click the "Yes, this is a game box" and arious options will appear in a floating bar. Simply ick the circular Record button to capture a video. You find your saved videos in the Game DVR section on the Xbox app, or inside your user folder under Video >

David Florence, MBA 4 days ago I am a huge fan of Mac OS and have used Win 8.1 since my "borrowed" my MacBook Pro a few months ago and has not an return it - she is finally a Mac fan. So until I get some for a new MBP, I am using my one year old Windows 1080p l thought Windows 8 was terrible. Windows 8.1 addressed my third party shell start Menu It was better, but the fu Windows Store apps were terrible. Plus, I ended up having four new users because of bugs in Windows 8.1 that stoppe	d will not extra funds aptop. I need of a ll screen to create
and store apps from running; they would just crash Now 10. Pretty sexy. A lot like Mac OS X Yosemite. Most of th features - Action Center, Full Screen previews, stronger Calendar native functions - I sometimes like a smaller em running when I am using my 16GB of RAM for big projects i Still has minor issues and bugs - somethings crashed and as advertised, but it is early in the game. Running three off my Laptop is a bit better than under 8.1. The new fon much better than before. As I said, as a Mac Lover, Windo good for Microsoft software. It is more "fun" and pleasan	e good Email and ail client n Adobe, etc. aren't working 1080p screens ts and GUI is ws 10 is very
than Me, Vista, Windows 7, 8 and 8.1 (update). I think it is a bit late for Microsoft to get back in the they have lost the phone and phablet market and are a wea tablets, getting back in the game at this point is a prob I think that if Apple can recreate a much better cloud so moving forward, offer multitasking on mobile devices movi tight integration between desktop and mobile platforms, t continue to win the consumer and corporate markets. That	game. Since k player in lem. Overall, lution set ng forward and hey should
10 is better than I had hoped for and is a legitimate sub Mac - and you can put a good laptop system together for a price of a MBP. So, if you want a good PC experience at a price, Windows 10 running on a 1080p i5 or i7 is not a ba () REPLY Dyre Logan 4 days ago So far, it takes a little getting used to. It definitely	stitute for bout 1/3 the reasonable d way to go. 0
from 8. And I am not part of the "hater" group that didn' tweak Windows 8/8.1 and thus a bumpkin. I did use Classic Shell and brought back the Start menu. settings to give me a smoother 8.1 experience. However, 8 constantly reverted back to default when I tweaked the se desired. Something previous Windows never did. They were 8.1 was not. I could never get rid of that infernal on screen keyboard	I did tweak my .1 ttings how I customizable,
tray, no matter how hard I tried. I could never keep my m settings as 8.1 ALWAYS reverted back to default after an it felt like it. I like using the inverted pointer as it see wherever it was. Other settings would revert back to default too after I c like UAC. Man, this bugged me! I changed it to never noti after a few days, here it was on again. Didn't matter how turned it off, Windows would turn it back on again. This	ouse pointer update or when was easier to hanged them, fy me, then many times I
as though MY PC was not Personal at all. Other stuff like hanging and/or black screens, very long times, and other problems made me long for Windows 7, but since my laptop was touch screen, it was not good to wipe go to a previous OS like 7 because then several of my har components may not work. A risk I was definitely willing news of a free OS in Windows 10 came along and decided th it. If I end up not liking it, I will dump it and buy Win or Amazon. Until then, I have some more tweaking to do wi	I was told the drive and dware to take, until at I might try dows 7 on eBay
Galapagos Duck 5 days ago It's still horrendous, & jumping from 8 directly to 10 in just their way of distancing themselves from the ridiculo Mistake. M/Soft is now loosing Billions (check it out) fr their purchase of Nokia just to have something to install OS's on. They thought they were going to kill Apple, Samsung etc &	us Win 8 om win 8 and their stupid
in portable devices,, but the problem is no one wants a wor tablet. Windows 10 will be their last attempt at the ridiculous & revert back to the old Win 7 style OS for their next rele They will have to because no one wants a new windows 8 winame of 10! By Adding back a bit of the old style sense t going to fix their sales with this dog of a Windows 8 Mk3	indows phone they will ase. th a different o 10 aint !
Aryudho Setianto 4 days ago Agree with your point, no one wants a windows phone gotta admit this windows 10 is pretty awesome. it is () REPLY 1 reply doledart. 4 days ago	• •
I've had a Windows phone since they first companies to take it serious. Now making it work on all devices and your setting follow Microsoft loginI think should be the big to Time will tell.	ext week. I was designed les for so all apps you with you
Marcus Kollar 3 days ago Ok you had absolutely no reasons for why window 10 and honestly windows 8.1 was not all that bad. Sore apple and actually will attempt to step out of the unique experience. I have alot of respect for Apple the same os after os and phone after phone. Get off negative band wagon and think for yourself. Windows and does a great job for your gaming group both pc Great job Microsoft () REPLY	ry their not box to give a e but they are f that s 10 is pretty
Erin Ford 5 days ago I am loving windows 10. My laptop that has Intel 1.83 Ghz like using my gaming PC. And windows 10 made my gaming PC This is awesome. People can say it is crap when really the that because they are Linux fan or apple Mac fan. When I Linux, no where can I find a Linux computers sold in standing it anywhere online either. Who in the hell would ins	processor is EVEN BETTER. ey are saying looked up ores, I can't tall Linux on
their computer with out knowing if it is safe. When I use system, it has to be computer manufactures selling them i it already on it. Not some person saying go install it. I manufacture don't have Linux computers to buy on their si stores then that there is a red light to stay away from i Linux cause people are saying how great Linux is and hone find anything that shows this is in any stores or on any manucatures site. I onlynlooked because I have never hear before. I have heard of Microsoft, APPLE and Android. And So don't listen to anyone about Linux ()	a operating n stores with f a computer te or in t. I google stly i can't computer d of Linux that's all.
Lewis Crowley 4 days ago Most software developers use a linux environment to software. You don't know what you're talking about start ebuyer sell Ubuntu computers do some resea preaching something you know nothing about. () REPLY Kev Michael 2 days ago You my friend need to go back to googlewhich independent of the software of the softwa	t. For a arch before
	TV boxes, and Windowsis to get it ill run as you
it, the average joe doesn't want to have to spend thow to use Command Lines to install apps, run programmer change a system setting, when they can simply point (though Linux is by large heading this way) As for how safe Linux isits a hell of a lot safe windows, due in part to both its design, and to the Windows is used on the home PC compared to Linux.	time learning rammes or t and click. fer then
As for Windows 10, having not been a windows fan si like it, I don't love it compared to Linux, but its and the upgrade went smoothly enoughtime will te think. I only use windows for gaming (Linux does su it has to be said) but MS will have to do something me to migrate away from Linux fully.	s fast, clean ell for me I uck at gaming, g special for
REPLY Revis Goodworth 6 days ago I see nothing of value in Windows 10 after beta-testing i much negative hyperbole against 8/8.1 which was not true hyperbolic lies in favor of 10. There is an industry out there to bash 8 and to promote 1 money. Idiots who can install an app on a phone were so	and many 0 - follow the
stupid to do so on a Windows machine for Classic Shell. same idiots won't get smarter working on 10. () REPLY 6 replies msabri 6 days ago Right on! Seems to me that the majority just jumped "let's all hate win 8" wagon mainly because there menu and new UI (and metro apps). these complains,	was no start in my
opinion, come from the same mentality that still cland refuse to join this decade. I personally have no problem with win 8.1 and could about the start menu and I think that win 10 is some refurbished version of win 8 () REPLY 1 reply BackupBob 4 days ago	dn't care less newhat a +1
Not everyone is the same. Some people have with Windows 8. Many people do. Microsoft' Windows 8 have been a disappointment overall have read. There would be no "Hate Windows 8" campaign did not have major problems. As with Vista it has disappointed many people.	s sales of , from what I if the product it works but
If Windows 10 does not catch on then Microso major problem on its hands. Corporate Ameri exactly embraced Windows 8 and if Windows 10 problematic they may look toward Red Hat Lin Mac. Where I work Red Hat Linux has replaced Sun the most part. Only Oracle runs on Sun any number of applications can run on Windows or many of these have been moved to Linux. Mic	ca has not is also ux or the Solaris for more. A Linux and
the only game in town. I like Windows. I hope Windows 10 does well out soon, when I migrate a retired machine t for testing purposes. As for Windows 8, I c with it. I stayed with Windows 7. And, no, Windows or Microsoft basher and I don't run	. I will find o Windows 10 ould not deal I am not a XP any more.
deltabear 6 days ago Looks like the "anti-vaxxer" trolls have uncovered global conspiracy () REPLY deltabear 6 days ago	<pre>9</pre>
Looks like some "ant-vaxxer" trolls have already ur next global conspiracy Thanks, Revis I feel sknowing that you're "out there!" () REPLY BackupBob 4 days ago Perhaps some of the "bashing" is because Windows 8	safer just +1 is difficult
for many people to handle. It is so different from versions that many people who are not tech savvy can it out. I know several of them. I have Windows 8 running on several laptops that I works well, with Classic Shell, but its use is limit feeding a projector for the most part. I can operate with Windows 8.1 or Windows 7. I firmuch easier to use because it is not trying to be to the service of the most part.	m prior annot figure manage. It ited to nd Windows 7 fancy all the
time. I cannot tell you how many times that accurs Charms Bar pop up unannounced, even when I am not r the corners of the screen. That there is so much discussion about usability th the Windows 8 life cycle tells me there is a proble product. Yes, it works. And no, it is not always inexperienced users to learn.	sed clock and near one of nis late into em with the easy for
I know may people who like Windows 8, or at least objectionable. I know far more people who hate it, of them abandoned Windows for the Mac. If you are a steep learning curve with your new computer there to stay with the O/S you have used for 20 or more y I hope Windows 10 does well. I cannot afford to mo Mac, both for reasons of cost and compatibility, but better than 8 I will have to make some hard choices	, and a number going to have e is no reason years. Dove to the ut if 10 is no
