# CephFS Declared Stable & Production Ready

**NEWS ARCHIVE** 

Written by Michael Larabel in Free Software on 21 April 2016 at 02:21 PM EDT. 1 Comment

Ceph 10.2.0 "Jewel" was announced today as their latest long-term stable release. Notable about Ceph 10.2.0 is that CephFS has been declared stable and production ready.

The Ceph.com release notes mention of CephFS, "This is the first release in which CephFS is declared stable and production ready! Several features are disabled by default, including snapshots and multiple active MDS servers."

CephFS also now has feature-complete repair and disaster recovery tools. There's also experimental support for multiple CephFS file-systems within a single cluster.
