A DIY Pro Carbon featuring Shimano Ultegra 6800 groupset is an amazing road bike combining quality, performance and value for money. Our most versatile road bike is perfect for every cyclist aspiring for a better ride.

High performance full-carbon frameset Shimano Ultegra 6800 11-speed Groupset Ambrosio Varo 11-speed wheelsset Weight: 8.1kg (MED) Full Description

Buying Options Description Reviews (0) feefo

Description

Build it yourself and save big!

There's more to the new Pro Carbon than just legendary performance, incredible value for money, stylish good looks and lustrous new paint jobs. The Pro Carbon has been perfected over years of continuous refinement that's why it's the obvious choice for every cyclist who aspires to better.

No one builds carbon road bike like Planet X. Because we control every step of production we ensure amazing quality and performance at prices no one else can match. The Pro Carbon Ultegra 6800 pairs our most popular road frame with our best-selling groupset. Kitted out with race-ready Ambrosio Varo clincher wheels and luxury finishing kit from Selcof and Selle Italia, it's a potent combination.

The comfortable versatile geometry of the Pro Carbon frame excels in any number of road applications. The mid-sized headtube keeps you in a moderate riding position, neither high enough to compromise aerodynamics nor low enough to be uncomfortable on longer efforts. The high quality Toray T700 carbon fibre construction provides stiffness where you need it and compliance where you want it. Skinny seat stays soak up road buzz and bumps while the compact front triangle and tapered headtube provide front-end stiffness and confident, responsive handling. Relaxing club rides, tough training sessions, challenging sportives or competitive races- the Pro Carbon shines at them all. Move your saddle forward and add some clip-on aero bars and you've got a great platform for trying out time trial or triathlon. It's not just a jack of all trades: it comes pretty close to mastering them all as well.

Bike Radar said about the pro Carbon: "The Planet X screams value for money from the rooftops with a megaphone." And: "When it comes to value for money, the bar is very high for what you can buy for 1,000, but if anything, the Planet X has raised it a notch or two."

When we say that you're getting a bike with a full Shimano Ultegra 6800 groupset, that's what you're getting. Brakes, derailleurs, shifters, crankset, the whole hog. Full integration, full compatibility: all components working as intended in perfect tandem with each other to provide 11 speeds of smooth, assertive shifting.

The Pro Carbon is often suggested as a great first road bike because of its affordable pricing, and it certainly is that. But it also provides better performance than many more expensive options, often matching the 'best bikes' of seasoned racers. Partnering it with Ultegra 6800 just puts it in a whole new category. Whatever your requirements, whatever roads you want to ride, the Planet X Pro Carbon Ultegra 6800 delivers the performance, quality and comfort you want at a better price.

Please note that spec may be different to that displayed in the photograph, please see spec table for exact details.

Additional parts required to complete the bike build.

- Rim tape x 2 Inner brake cable Outer brake cable Outer gear cable Gear Ferules

As these bikes are shipped unassembled you will require certain bike tools to complete assembly. An allen key set, BB wrench, torque wrench, cassette locking tool, headset press, hacksaw and fork cutting guide chain tool/pliers and cable cutters should be considered an absolute minimum.

Don't fancy building it yourself, we can do it for you and we'll add in the extra bits, see price below.

Please Note: the dispatch time for these bikes is approximately 48 hours

Full Spec

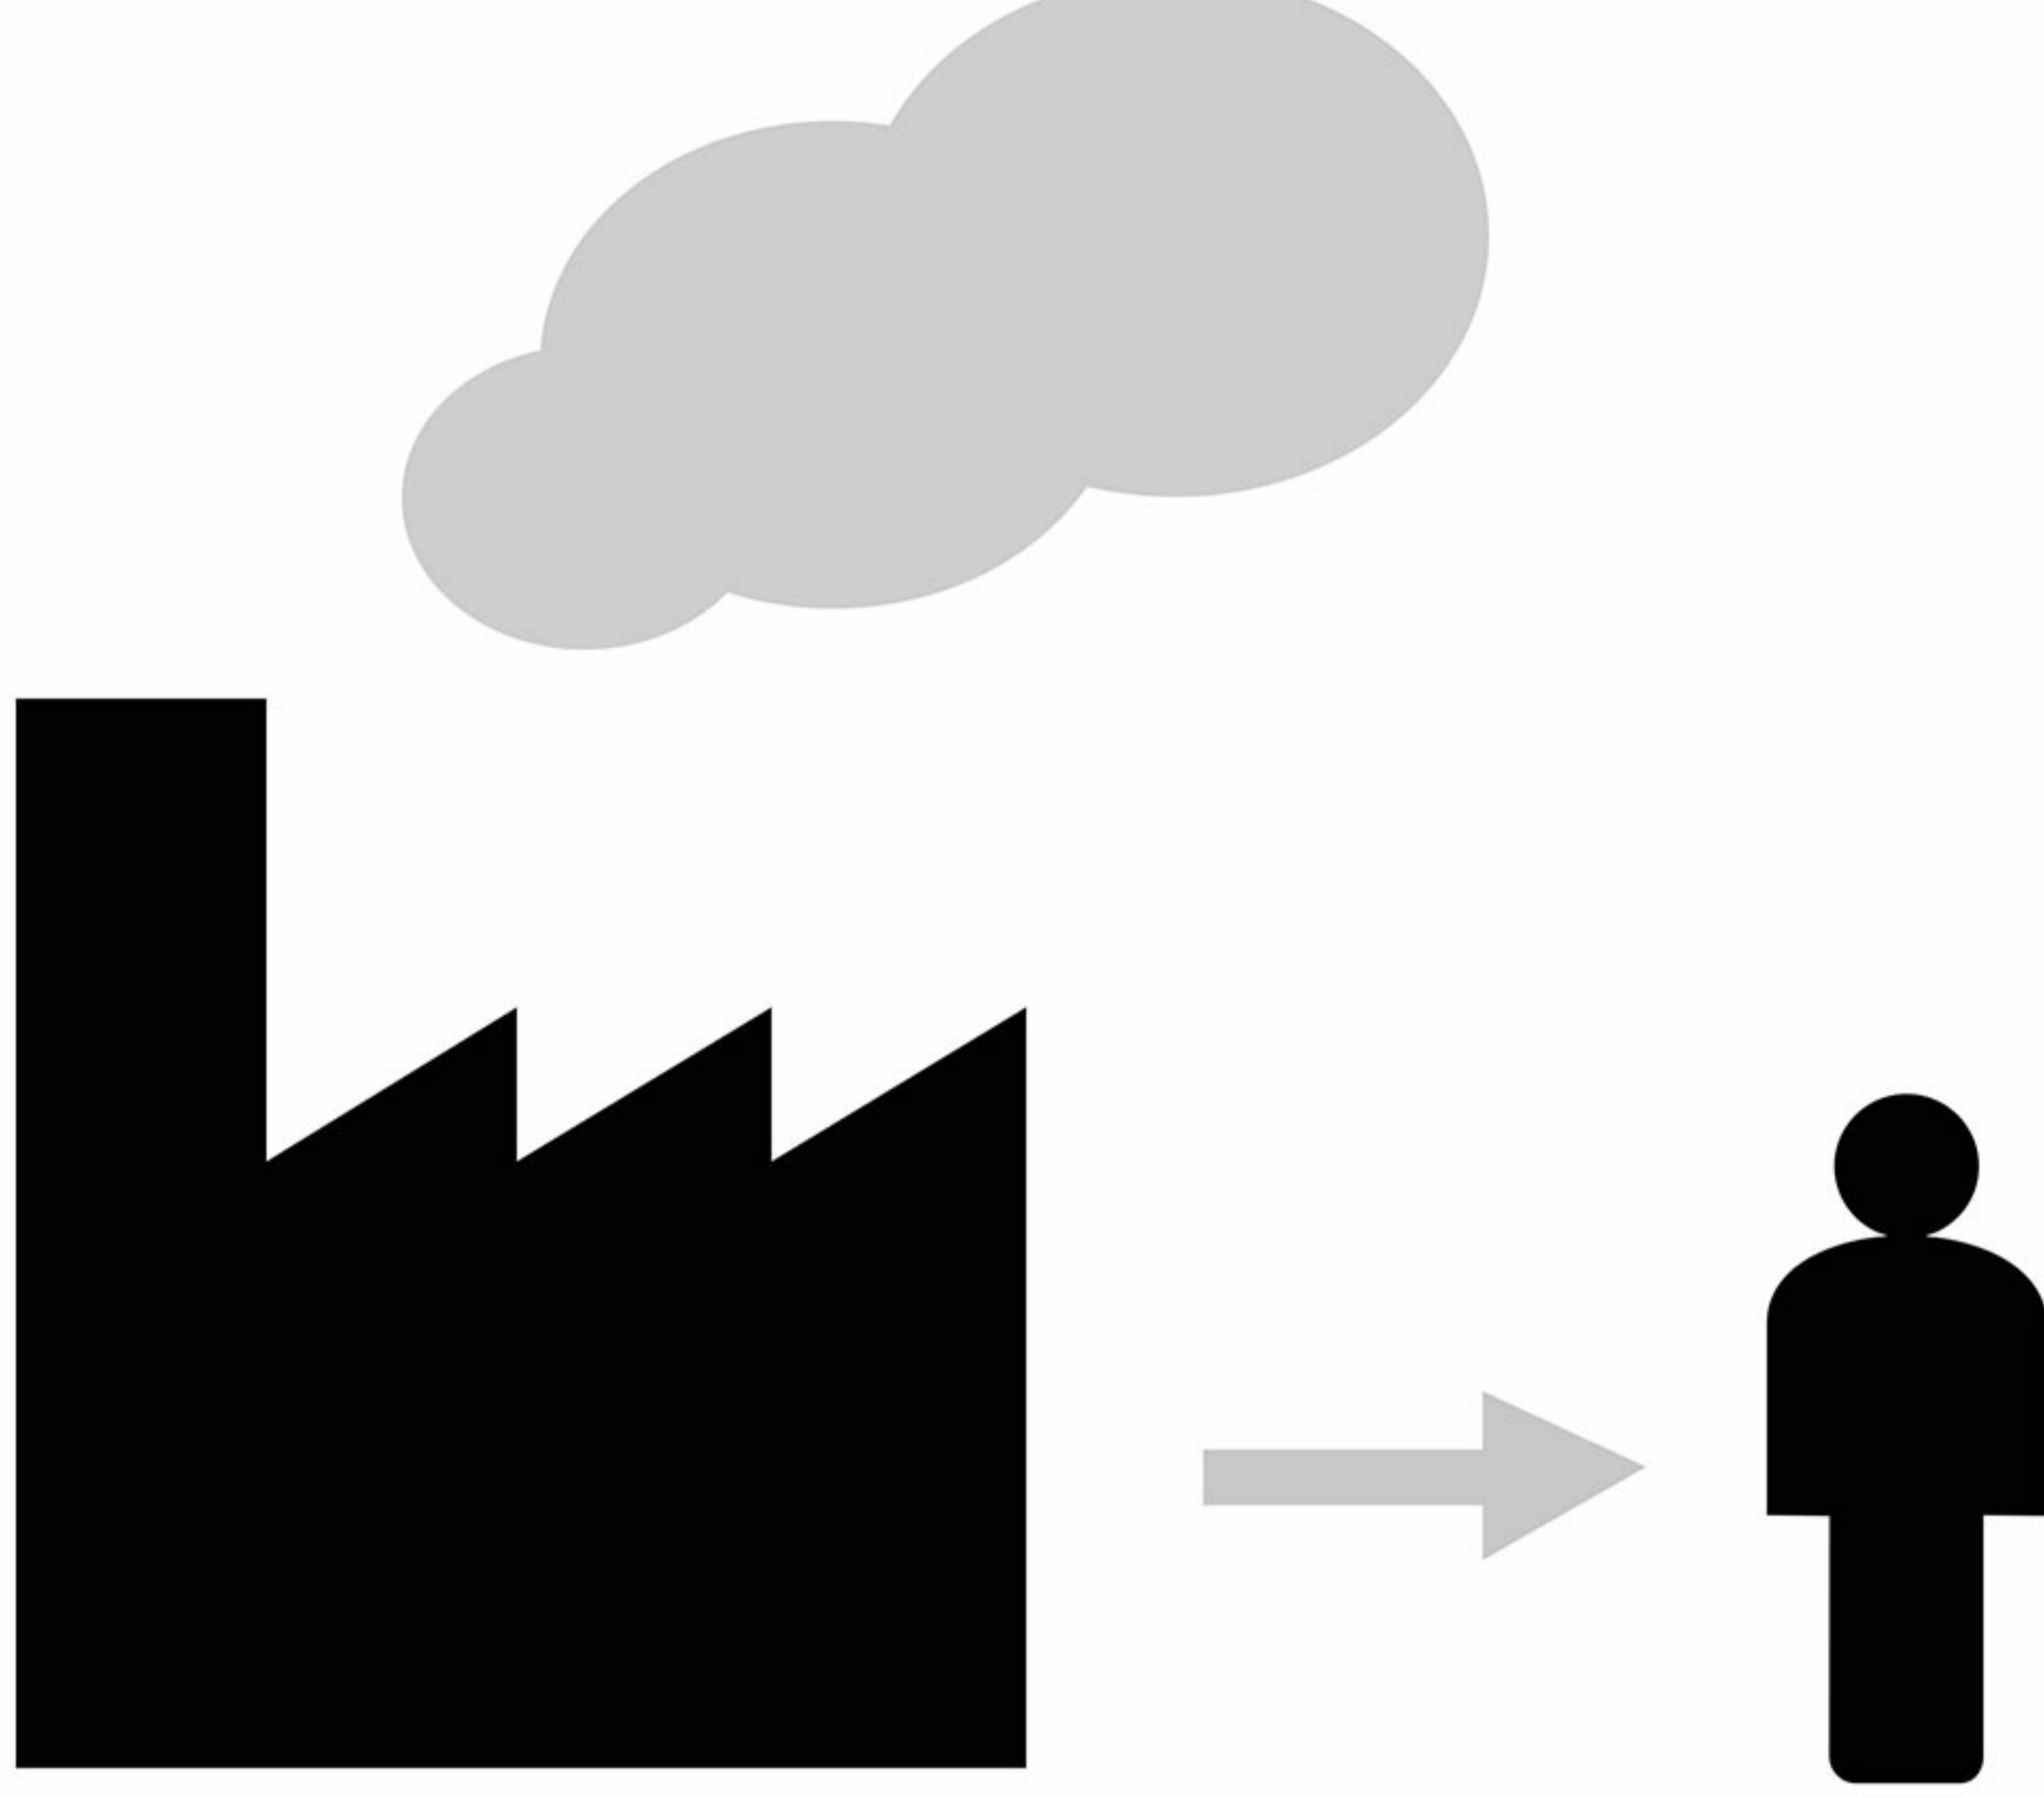

Table with 2 columns: Component Name and Description. Includes items like Gear cables, Head Set, Front Mech, Seat Clamp, Bar Tape / Grips, Frame Spare, Tyre, Saddle, Stem, Seat Post, Chain, Handle Bar, Front Set, Head Mech, Brake, Cassette, Rear Mech, Wheel Pair, Gear Levers, Crank Set.

## Key features

### Versatile Compact Geometry Frameset

The Pro Carbon is our classic, do-it-all road frameset. Its compact geometry delivers day long riding comfort and matchless versatility for all riding styles.

### Direct To Customer

We supply everything we make direct to customer, there's no middle men or wholesalers adding anything to the cost. That's why we're able to offer you unmatched value for money- straight from our warehouse to your door

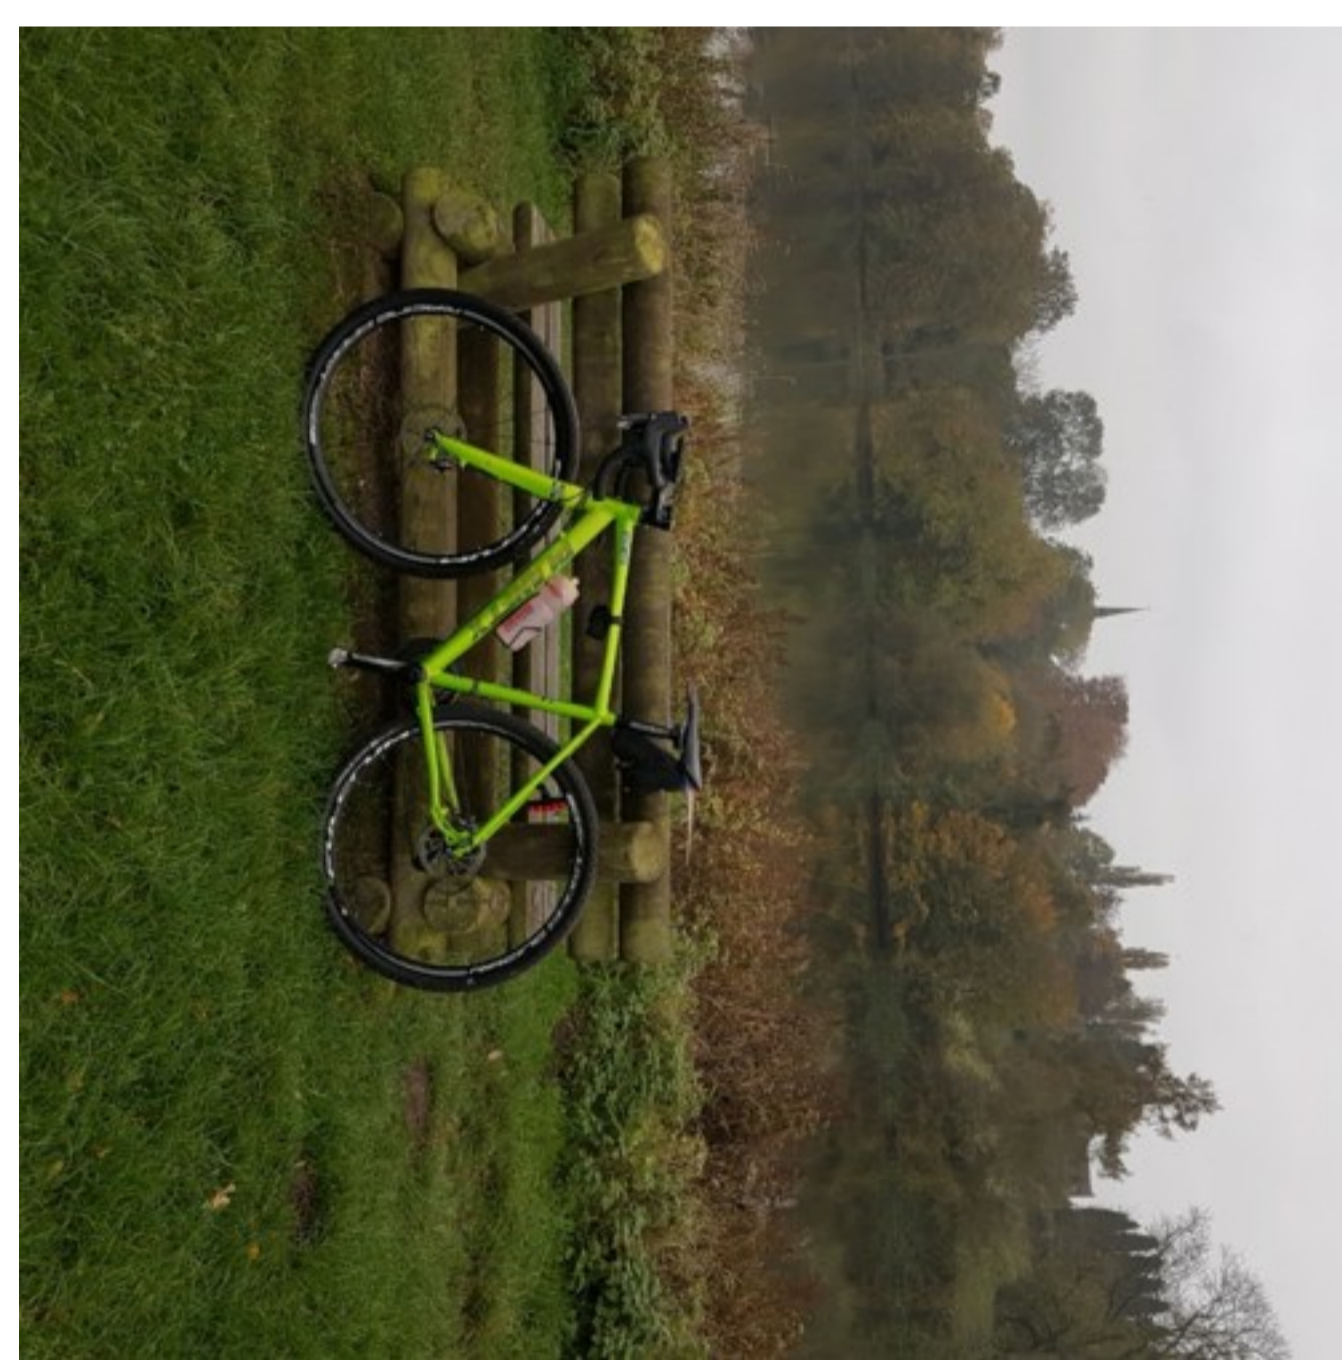

### Shimano Ultegra 6800 11-Speed Groupset

Ultegra 6800 is the sweet spot for price-performance in Shimano's line-up, that's why it's their most popular groupset. With precise, fast and accurate shifting, powerful braking and comfortable ergonomics it's a winner

Yorkshire Born and Bred. Our bikes are designed, tested and assembled in Yorkshire. Every model is put through its paces across the toughest road or off-road routes that the Peak District has to offer. Just like us, they are Yorkshire Born and Bred
