

# Welcome to Taskwarrior

Taskwarrior is Free and Open Source Software that manages your TODO list from the command line. It is flexible, fast, and unobtrusive. It does its job then gets out of your way.

### HELLOTUX Shirts (/news/news.20170308.html) 2017-03-08

We'd like to thank HELLOTUX (<https://www.hellotux.com/>) for doing a fantastic job designing embroidered apparel for Taskwarrior fans. This is the real thing - quality embroidery, not merely printed.

The Taskwarrior project receives some money for each item sold.

### Activity Digest: February 2017 (/news/news.20170301.html) 2017-03-01

The team attended FOSDEM (<news.20170208.html>) in Brussels, all meeting for the first time. No one was hurt. Although we had hoped to accomplish a lot during this time, we instead fell in love with a certain restaurant and Belgian beer.

We would like to welcome Thomas Lauf, who is now pushing to the Timewarrior repository, and Timewarrior is now being fixed and improved at a much faster rate. Welcome, Thomas.

The flod2 CI system is coming online, which means that Taskwarrior is now being built in parallel by two CI systems as we prepare for a more general transition.

- Taskwarrior 2.6.0 on Flod (<https://central.tasktools.org/task-2.6.0.html>)
- Taskwarrior 2.6.0 on Flod2 (<https://tyuratam.tasktools.org/task.2.6.0.html>)

A generous donation from DigitalOcean (<https://www.digitalocean.com>) is making this possible.

### Activity Digest: January 2017 (/news/news.20170209.html) 2017-02-09

The rat parser is now mostly complete, and ready to take on the syntax of the rules system.

The Taskwarrior bug database (<https://bug.tasktools.org>) has had another cleanup pass that removed obsolete or accidentally fixed issues.

The flod2 CI system is now online and is about to begin processing builds instead of the old flod system. Both system will be online until the switchover is complete.

Finally, the team spent a little time getting ready for FOSDEM.

### FOSDEM 2017: Reprise (/news/news.20170208.html) 2017-02-08

It was the first time the whole Taskwarrior Team met in carbon space.

What do you get when people from the US, the Czech Republic, Germany, Sweden and Switzerland meet for the first time?

### FOSDEM 2017: Taskwarrior Presence (/news/news.20170113.html) 2017-01-13

The Taskwarrior Team will be attending FOSDEM 2017 (<https://fosdem.org/2017/>) on February 4th and 5th in Brussels.

There is no better opportunity to register your complaints directly and receive your own personalized sincere apology and refund.

We should be easily recognizable: that far-away look in our eyes, logo stickers, beer and of course, no mouse.

Find us, talk to us. We'd love to hear what you think.

### Activity Digest: December 2016 (/news/news.20170102.html) 2017-01-02

Both Taskwarrior and Taskserver improved GnuTLS support, in particular with more robust certificate validation, and error reporting/logging.

The rat parser is now handling complex grammars, such as the clog configuration file, and will later be used to handle command line parsing in all projects.

The Taskwarrior overhaul of recurrence features has begun, which will culminate in the 2.6.0 release with new types of recurring tasks.

...

### In-House Talk and Workshop at TNG Technology Consulting (/news/news.20161209.html) 2016-12-09

TNG Technology Consulting GmbH, of Unterföhring Germany, hosted an internal event "Techday" on December 9th, which is a regular occurrence at TNG.

TNG invited Dirk Deimeke to attend and give a talk and workshop, where he discussed Taskwarrior and related projects, with a workshop that covered a lot of functionality.
