

Text from your computer, sync'd with your Android phone & number

OVER 7 MILLION USERS

GET THE FREE APP

Text From Any Device

Send & receive SMS and MMS from your computer or tablet, using your current Android phone number. Messages stay in sync with your phone's SMS inbox.

Phone Notifications on your Computer

Never miss notifications from apps like WhatsApp, Snapchat, and Instagram.

You can even dismiss them right from your desktop.

Awesome photo & video syncing

Instantly & securely store photos & videos taken from your phone to your computer or tablet.

Dead simple, 1-click photo sharing. Apply Instagram-like filters and effects too.

Call Notifications

Get notified on your computer or tablet when someone calls your Android phone.

PRO

Schedule Messages

Schedule messages to be sent out in the future.

Phone Battery Alerts

Wherever your phone is, know exactly how much battery life it has left from your Web App or tablet app.

Send Web Pages, Maps, and Photos To Your Phone

Instantly push web pages, files, maps, photos and more from your computer to phone.

Text Directly From Gmail

SMS directly from Gmail on your computer. Just like a Google chat/hangout window.

PowerView

Built for the text-obsessed. Carry on multiple conversations simultaneously.

PRO

Themes

Beautify MightyText with 17 themes.

PRO

SMS ↔ Email Sync

Manage your text messages from your email.

Edit Photos With Filters

Edit photos directly from the web app by adding Instagram-like filters, frames, stickers & more.

PRO

Templates

Sending the same message content over and over? Use templates to save time.
