Introduction to DevOps

 Informer un ami  Partager

mercredi 21 juin 2017

18:45

The Gradient Building

Avenue de Tervuren 270, 5th floor, Brussels (plan)

Welcome to the first Belgium DevOps Meetup.

The objective is to organize conferences & trainings, share best practises & present real cases related to DevOps. It will also be the opportunity to enjoy a relaxing moment around a drink & share with DevOps enthusiasts.

Feel free to join us for a pleasant moment in which we exchange thoughts, ideas, knowledge & experiences about DevOps.

The agenda will follow as:

1. Kick-off of the Meetup - Introduction (15min)

2. Start of the presentations. There will be a 2 presentations and the duration will not exceed 30 min.

We have the pleasure to confirm our first Speaker. Maxime Choffat will propose an introduction to what is DevOps. He will browse the following topics:

- *What are the term roots & how it became trendy?*

- *How is it linked to Agility?*

- *How is its perception & influence on an organizational, structural & methodological perspective?*

He will also present some useful tools.

Maxime hold a Master in Imagery & Virtual reality and has been working 5 years at IGNF (National Institute of Geographic and Forestry Information on process improvement. He is an early Devops principles adopter. He is currently Software consultant at Nalys

3. Break & pizza's

4. Our second speaker is Quentin Loos. He holds a Master in Computer Science & in Cryptography & algorithms. He currently works at DNS Belgium as Java Devops Engineer.

Although his main focus is the Java development, he knows what is operating the production and believes in DevOps as the best way to do so. He will present different tools and tips to introduce DevOps and will give you a feedback on how the engineering team in DNS Belgium is experiencing DevOps and Scrum for 2 years now.

5. Drinks & networking

Doors open at 18.45 & the first presentation will start at 19.15. Food & drinks are provided

This event is sponsored by Nalys

I fear that I will not be able to make it. The odds are currently at 20% chance to be able to attend.

(disappointed)

Maxime C.

Mee too ! Really hope you can make it !

il y a 39 minutes

Phani

Sorry unable to attend as it is clashing with Docker meetup tomorrow.

Hier

Fabrice D.

No worries. next time then

Fabrice D.

For those who wonder what would be the purpose of this first MeetUp, here are some explanations: "DevOps is a new trend covering processes, culture and tools around software build, deployment, etc ...

So there is no link to a programming language, the idea is to apply it to your context (no direct link to languages and technologies).

The presentations will be a general introduction to those who don't know what it is about and a feedback from an engineer that is transforming to DevOps and will give a day to day point view."
