Private email

Privacy is a right, not a feature.

No tracking

No ads, no spams, no trackers, no solicitations, no backdoor, free from government surveillance.

Privacy protection

State of the art security features protect your email privacy at all times.

Legal protection

Belgian privacy protection law is strong. Only local judges can request information and they must have a court order. It rarely happens.

[Read more](#)

Secure email

Encryption is the answer.

Encryption

Encryption happens in the browser. It is impossible for anyone (including us) to read your emails along the line. Fully inter-operable with any OpenPGP service.

Digital signatures

Your digitally signed email guarantees the recipient that it has been sent by you and only you. There is no way of faking the sender address.

Keystore

Create, import, publish and manage OpenPGP keys easily. Nothing to install. We offer full control and total freedom.

Emails and more

An integrated suite of tools.

Messages

Web, POPs, IMAPS, SMTPS and mobile accesses. Aliases, own domain name, access to third-party mailboxes, etc.

Calendars

Put your private appointments in our user-friendly calendar. It's handy to use and you can share it securely.

Documents

Safely store all your documents. Edit online and share them with one click.

Contacts & Groups

Import your contacts from all your accounts. Create groups to share your data securely.

Why Mailfence

Ease of use with real security.

Easy

Browser-based, no plug-ins, no add-ons. Easily create and manage your keys in a single place.

Private

Cryptography is done by your browser. You are protected by Belgian law. No third-party access to your data.

Secure

True OpenPGP end-to-end encryption on a secured infrastructure.

Freedom

Choose which emails to encrypt, communicate securely with anyone using the OpenPGP standard, import/export keys.

Our story

We believe that online privacy is a fundamental human right which can no longer be taken for granted so we decided that it was time to offer a service which is fully dedicated to email privacy. We double-checked every line of code, hardened our servers, worked hard to find a SSL certificate with no American certification authority involved in the certification chain (not that easy to find) and developed a unique and inter-operable End-to-end Encrypted email solution which includes digital signatures. We did tons of other stuff as well related to [data security](#). We cannot guarantee that the Service is perfect - nothing ever is. However, we are sure that it is as

secure and private as you can hope to get, with far greater respect for your privacy than the American equivalents offer.

Our team is competent and passionate. We are cautious, reliable, stable and honest.

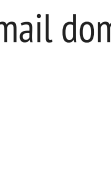

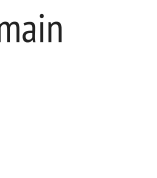

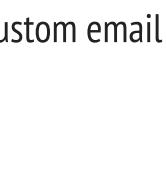

We launched in 1999 and we are in for the long run.

Reclaim your email privacy.

Plans

Start with the free plan. If you need more, upgrade.

	Entry 2,50 € per month	Pro 7,50 € per month	Business From 20 users Contact us
Free			
200 MB emails	5 GB emails	20 GB emails
