So, how to get into Android recovery mode? For new Android users, it may be a troublesome problem facing them. Don't panic, here we provide an easy guide showing you how to make it without any difficulty.

Part 1. Boot into Recovery Mode on your Android Device

Part 2. Fix Recovery Mode and Get Back Files

Getting into Recovery Mode on Android smartphones from different brands might be slightly

Part 1. Boot into Recovery Mode on your Android Device

you how to enter the Recovery Mode in detail. Section 1 Boot Samsung Galaxy into Recovery Mode

different. In the following article, we will take several popular brands of Android devices and show

holding down the Power key and select "Power off" option.

Then keep pressing and holding Power Key, Volume+ and Home button at the same time until you see the Samsung logo. Now, you can select the recovery mode option by using the Volume keys to highlight and the Power key to confirm.

a For Galaxy S8/S7/S6/S5 or other Samsung devices, you should firstly turn the phone off by

1. To start with, get your LG power off.

2. Press and hold the Power key and Volume- button simultaneously. 3. When the LG logo appears, release the keys. Then, immediately press the Power and Volumebutton again until the Hard Reset menu displays.

4. Once the menu showed, use Volume keys to highlight an option and press Power button to

confirm hard reset. Now, your LG is in the Recovery Mode.

your device

- Section 3 Enter Recovery Mode on HTC
- 1. Go to "Settings > Battery" on your HTC and uncheck the option that says FASTBOOT. 2. Power off the smartphone and wait for about 5 seconds until it completely switches off. 3. Then, press and hold Volume- button and press the Power key.
- down button to navigate to the options in Bootloader Mode, and confirm "Recovery" option with Power button. In this way, you can get into Recovery Mode.

3rd Tap Power Button once

(while holding down the Valume Down button)

4. When you can see the new menu appears on the screen, release the keys. Use the Volume

4. The white Google logo will pop up. Please continue to press and hold the Power key and the Volume up key for around three seconds, and then let go of the Volume up key, but keep pressing
