

## Overview

The EasyList filter lists are sets of rules originally designed for [Adblock](#) that automatically remove unwanted content from the internet, including annoying adverts, bothersome banners and troublesome tracking. The filter lists are currently maintained by four authors, Fanboy, MonzTA, Famlam and Khrin, who are ably assisted by an ample forum community.

The links listed below allow you to select filter lists for use in your browser provided that you are using a compatible ad blocker (tested with [Adblock Plus](#), [AdBlock](#), [uBlock Origin](#) and [uBlock](#)). Furthermore, EasyPrivacy Tracking Protection List is available for [Internet Explorer 9](#) and higher.

### EasyList

EasyList is the primary filter list that removes most adverts from international webpages, including unwanted frames, images and objects. It is the most popular list used by many ad blockers and forms the basis of over a dozen combination and supplementary filter lists.

### EasyPrivacy

EasyPrivacy is an optional supplementary filter list that completely removes all forms of tracking from the internet, including web bugs, tracking scripts and information collectors, thereby protecting your personal data.

### Fanboy's Annoyance List

Fanboy's Annoyance List blocks Social Media content, in-page pop-ups and other annoyances; thereby substantially decreasing web page loading times and uncluttering them. Fanboy's Social Blocking List is already included, there is no need to subscribe to it if you already have Fanboy's Annoyance List.

### Fanboy's Social Blocking List

Fanboy's Social Blocking List solely removes Social Media content on web pages such as the Facebook like button and other widgets.

If you should encounter unwanted items or problems with the EasyList filter lists you should report the issues in the [EasyList Forums](#). No registration is required. This will allow members to assist you in resolving problems and will notify the authors that the filter lists should be updated, a change that will rectify the issue for all users. You can also request assistance by [e-mailing the EasyList authors directly](#).

Problems with other filter lists should be reported to their respective authors.
