Cause it is a flat circle, the Earth is a flat circle in space.
The reason why global warming exists is because when the sun is perpendicular to the flat surface we recide on. The earth get's heated up.
But when the sun is facing the butt of the Earth it's heating up the ground and creating winter.
Learn science people this is 3rd grade stuff

[–] Cosmosus 19 points 6 hours ago
The picture's actually an edit someone made, the Earth should look like a sphere from this location.

I wish they had a mode where it showed that way, it's rather funny.

It's obviously an optical illusion. Just walk up to your monitor and look at it from the side and you'll realize that it's very flat.

The earth is flat on the inside. Round on the outside.

Did a flat-earther go out and do something stupid and newsworthy recently? Because I've been seeing a shit about people talking shots at flat-earthers recently and I'm sitting here wondering why everybody suddenly gives a shit about them.

A month ago a flat-earther planned on launching himself into space in a homemade rocket to prove the Earth is flat.

[–] Jimmy-McBeebag 5 points 2 hours ago
What happened with that? Last I heard he postponed it a few days then I've not seen anything since.
He dead? In orbit? On the underside?

The government locked him away because the public must never know the truth. Soon he'll show up again and tell everyone that he was wrong and Earth is actually round, but government brainwashing takes a while.

He was hoping to get to a height of **1,800 feet**.
There are literally buildings taller than that.
You could simply go on a hike to a height taller than that.
Airplanes go to 30,000 feet.

Flat-Earthers are found all over the globe ;)
I watched 2 flat-earthers doing a Skype video on YouTube. They had to coordinate carefully because their timezones were so different. Day time for one and night for the other. You know, since they were on opposite sides of the globe. I love these people

Sphere planet in a FICTIONAL game. Your attempt was weak.

This is how it should actually look when viewing from the moon. One of the main arguments that NASA never went to the moon is this famous picture is fake, because the Earth is WAAAAAAYYYY too tiny.

Is this what gaming has come to? Unfinished games hitting retail shelves now?
