## Android users: Beware these popularity-faking tricks on Google Play

Tricksters have been misleading users about the functionality of apps by displaying bogus download numbers

Share

It seems that tricksters on Google Play (https://www.welivesecurity.com/?s=Google+Play+) have found another way to make their deceptive apps appear more trustworthy to users – that is, at least at first sight.

(https://www.facebook.com/sharer/sharer.php?u=https%3A%2F%2Fwww.welivesecurity.com%2F2018%2F06%2F11%2Fandroid-popularity-faking-tricksgoogle-play%2F)

The trick takes advantage of the fact that apart from the app icon and name, there is one more element the user

sees when browsing apps – the developer name, displayed just below the app name. And since unknown (https://twitter.com/home?status=Android users: Beware these popularity-faking tricks on Google Play%0Ahttps%3A%2F%2Fwww.welivesecurity.com%2F2018%2F06%2F1%2Fandroid-popularity-faking tricks-google-play%2F via @Welivesecurity) fictitious, high numbers of installs as their developer names, in an effort to look like established developers with

(in)vast userbases. (https://www.linkedin.com/shareArticle?mini=true&url=https%3A%2F%2Fwww.welivesecurity.com%2F2018%2F06%2F11%2Fandroid-popularity-fakingtricks-google-play%2F)

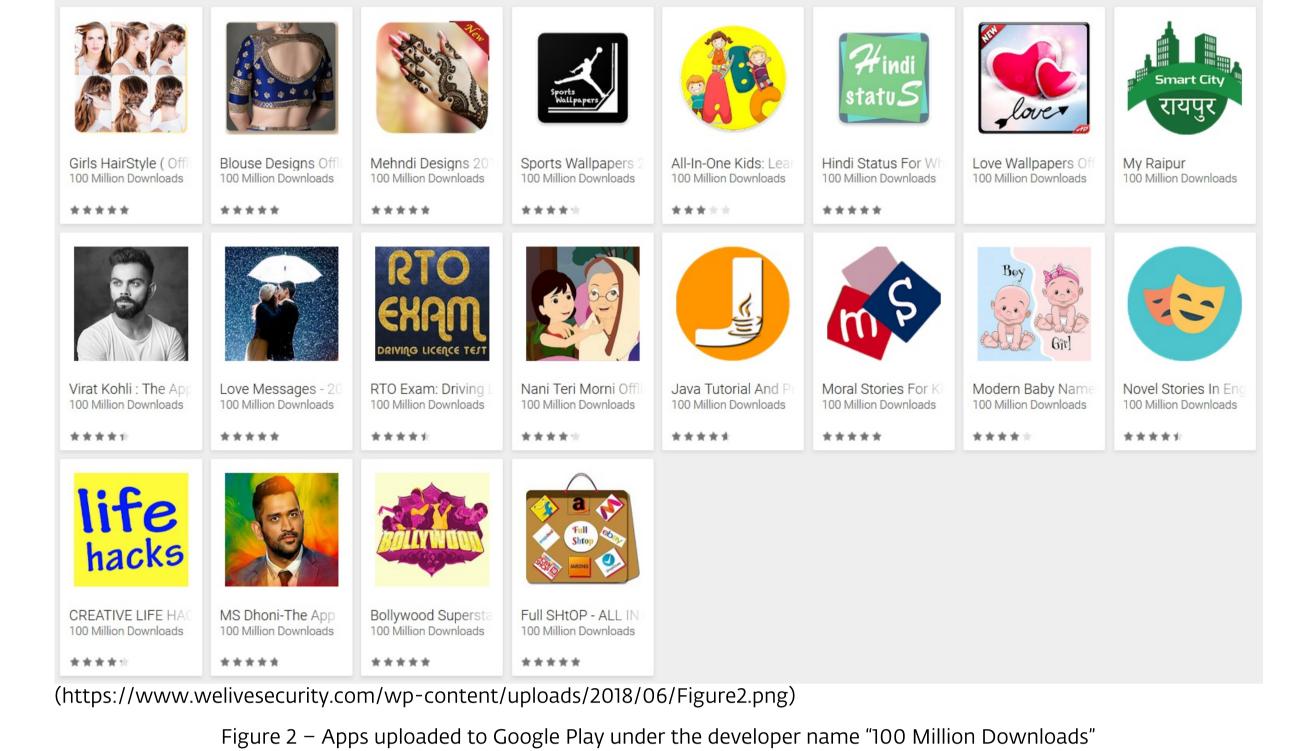

We have discovered hundreds of apps using this and similar tricks to deceive users. The apps we've analyzed.

(https://plus.google.com/share?url=https%3A%2F%2Fwww.welivesecurity.com%2F2018%2F06%2F11%2Fandroid-popularity-faking-tricks-google-play%2F) were either misleading users about their functionality or had no functionality at all, yet most display many advertisements.

Figure 1 – Apps uploaded to Google Play under the developer name "Installs 1,000,000,000 – 5,000,000,000"

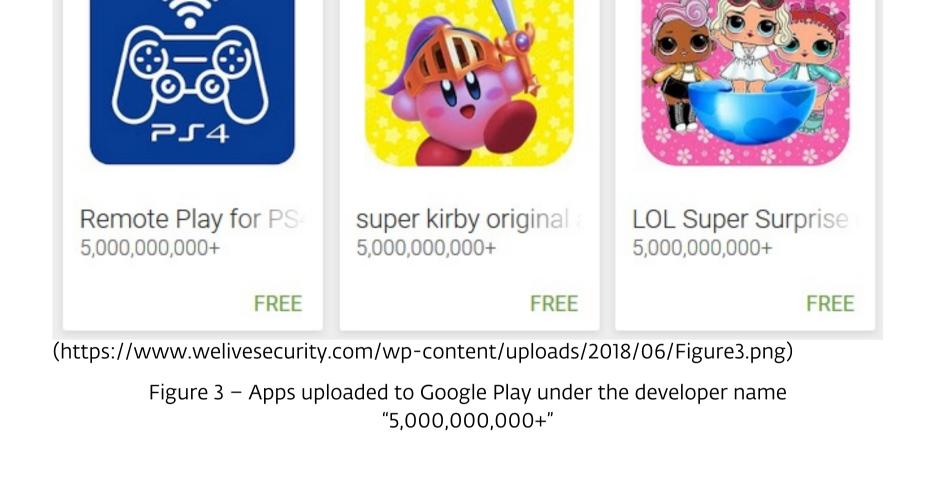

(https://www.welivesecurity.com/wp-content/uploads/2018/06/Figure1.png)

The freedom to set any number of choice as developer name has inspired some remarkably ambitious claims –

times. (Note: the highest-ranking apps in terms of number of installs fall into the category "1,000,000,000+" at the time of writing; this category includes Google Play itself, Gmail, Facebook, WhatsApp, Skype, etc.)

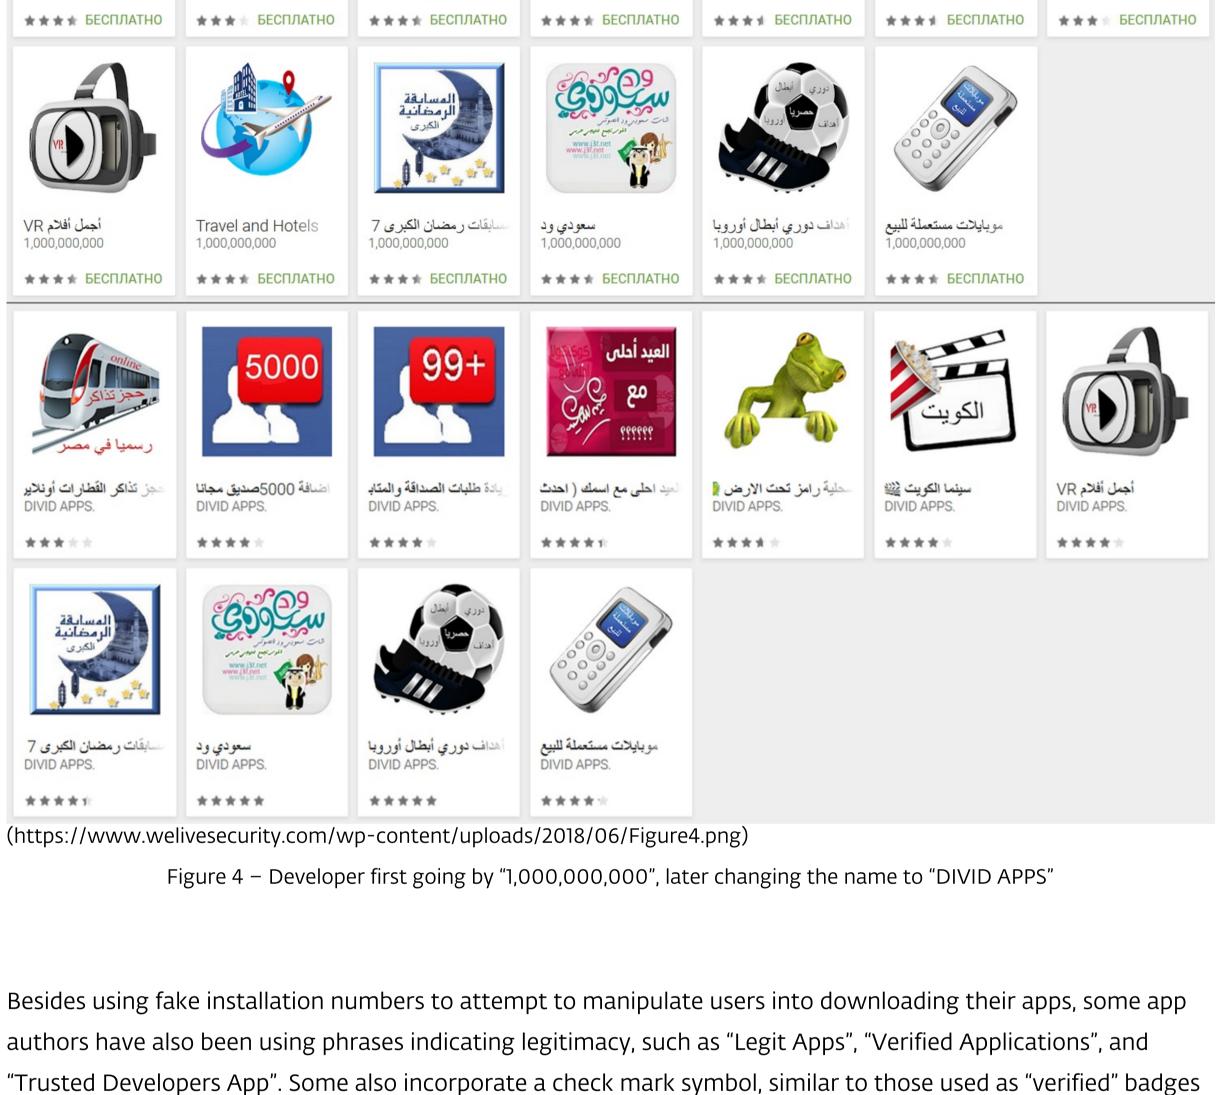

one game developer, for instance, would like users to believe his games have been installed more than five billion

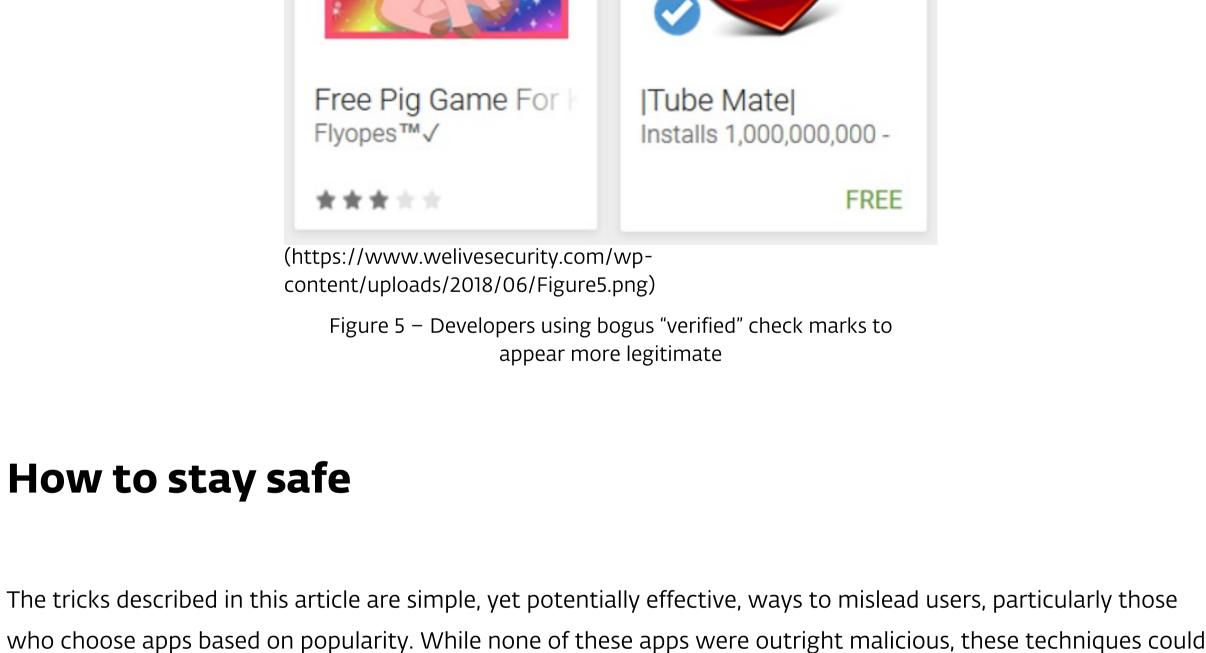

developer name over time, which might indicate the trick is used as a temporary measure aimed at boosting the popularity of newly uploaded apps.

In one particular case, we saw a developer change his name from a fake installation number to an actual

العيد أحلى اعید احلی مع اسمك ( احدث 1,000,000,000 خلصانة بشياكة يادة طلبات الصداقة والمتاب حز تذاكر القطارات أونلاير حلية رامز تحت الارض 🧌 سينما الكويت ع يخربيت يا كيف. 1,000,000,000 1,000,000,000 1,000,000,000 1,000,000,000 1,000,000,000 1,000,000,000 **★★★** БЕСПЛАТНО **★★★** БЕСПЛАТНО ★ ★ ★ ★ БЕСПЛАТНО **★★★** БЕСПЛАТНО **★★★★ БЕСПЛАТНО** ★★★ БЕСПЛАТНО **★★★** BECПЛАТНО

for the accounts of well-known personalities and brands on various social media sites. These are variously included in app icons and names, as well as in developer names. As Google Play does not offer a developer account verification service, any app sporting such a tag should necessarily be considered suspicious.

## Make sure to only take the number of installations for each app from the app's Google Play page, as this is the official

what to focus on:

Keep in mind that Google Play does not have a "Verified" badge signifying the legitimacy of apps. It does have the "Editor's Choice (https://play.google.com/store/apps/topic?id=editors\_choice)" category, marked by the Editor's Choice badge in the top right corner of the app's Google Play page. Make sure you read user reviews before downloading any app.

If an app only has a small number of real installs, and/or was only released within the last few days, leave it for others to

easily be misused by malware authors in the future. Fortunately, the tricks are also simple to spot, if you know

number. This will be visible in the "Additional Information" section at the bottom of the page.
