[#itunesconnect](#) [#appstoreconnect](#) Anyone else having issues accessing 'Users and Roles' on app store connect? I get 'server not found' error. Other pages are working fine.

Gabrielle Earnshaw @GabEarnsh · 2 h

[@AppleSupport](#) [#appstoreconnect](#) [#itunesconnect](#) anyone else still experiencing issues? I can log in and access the portal, but get a generic 'server not found' error when I try to go to Users and Roles. Status is green :-/.

Danny Iachini @eyekeyknee · 9 h

[#appstoreconnect](#) "new" MacBooks announced, and the portal for submitting apps is completely broken 18+ hours before and after?

Kais K. @Kaiusee · 9 h

is [#iTunesConnect](#) / [#AppStoreConnect](#) having issues? I can't access some sections and images are not loading [@AppleSupport](#)

I wonder if apple takes availability too direct from CAP theorem, serving blank pages and reporting availability to the status page.

Yep Hours now.

[#itunesconnect](#) [#appstoreconnect](#)

What's up [@AppleSupport](#) ?

Is anybody else having trouble with [#appstoreconnect](#) / [#itunesconnect](#) this morning? I can't seem to convince it to load anything.

[@AppStore](#) what's going on? Why [#appstoreconnect](#) still not working? Just an empty page with a wheel since yesterday! [pic.twitter.com/y7E9y74PZ8](#)

[@AppStore](#) what's going on???

Our Apps have just been reviewed, sitting in [#appstoreconnect](#) ready for release and yet your downtime blocks us from pushing the button... This is ridiculous!

I hate the [#Apple](#) [#AppStoreConnect](#) so much. It's just a giant warehouse piled high with buggy and downright broken services.

Is anyone aware of Apple App Store Connect maintenance or issues? All my App builds are waiting in processing. Been a few hours, they're usually pretty quick! [#apple](#) [#appstoreconnect](#)

[#AppStoreConnect](#) takes ages for processing my [#ios](#) build...🙄

Shashikant Jagtap @Shashikant86 · 3 juil.

Wrote a tiny Ruby Library to generate on-demand JWT Tokens for Apple's brand new AppStore Connect API. Hopefully this will be helpful to generate tokens from Continuous Integration Servers [#swift](#) [#appstoreconnect](#) [#iosdev](#)
