If you're having trouble with the sword, try pushing the sword button.

Subject: Shift Key

NEVER push the right shift key. Always use the left one. There is a bug in this game. If you push the right shift key by accident, the key "freezes". You cannot go out of the slow walking mode anymore.

Subject: OMG!!!

I can't believe after all these years I get to play this game WHENEVER I want :) Big thank you to whoever was involved in this.

I gave 4/5 stars because of the buggy sound. Would be 5 if it was flawless. Would be helpful to list controls too

The best game ever. So simple to use with fantastic effects (for that time). My first (and last with the colored POP2) loved game.

Subject: Great game!

Loved this game on my 386.

Shame the sound is a bit screwed up when playing in the browser. Hopefully this will be fixed!
