**WARNING:** California's Proposition 65

**Product description**

Over the past several years there's been a revolution in the way people store, distribute, and access digital media (in real time), including photos, movies, and, of course, music. No longer dependent on physical media, our media is often data that's moved from multiple devices to multiple locations. For audio applications and protocols, audio over Ethernet offers the virtues of high-speed, low time delay (latency), significant distance capability (328 feet without an active booster or repeater), and extremely low-jitter, bit-perfect communication. Who wouldn't want all of these things?

**Product information**

Package Dimensions	11 x 7.8 x 2.2 inches
Item Weight	1.29 pounds
Shipping Weight	1.29 pounds (View shipping rates and policies)
Manufacturer	Audioquest
ASIN	B0073HI94M
Item model number	RJEDIA03
Customer Reviews	★★★★☆ 27 customer reviews 3.7 out of 5 stars
Best Sellers Rank	#43,247 in Industrial & Scientific > Industrial Electrical > Wiring & Connecting > Cables & Interconnects > Ethernet Cables #339,730 in Electronics > Accessories & Supplies > Cables
Date first listed on Amazon	January 30, 2012

★★★★☆ **Do not waste your money. This stuff is "snake oil".**

February 10, 2015

Digital is digital. So long as the bits and bytes get to where they're going, there is zero difference between a \$3 cable and a \$3,000 cable.

On a cable run this short, there's no non-deliberate way to induce enough RF interference to cause the cable not to work.

And if, somehow you WERE, simply buy a \$5 shielded cable, instead of a \$3 unshielded cable.

And, on that note, with a bit of further investigation, this \$3000 cable isn't even shielded twisted-pair. It's unshielded twisted pair. So if you ARE going to pull RF interference, this cable won't help you worth a damn.

Shielded twisted pair is a slightly thicker, more rigid cable with a, for lack of a better common term, "foil" lining around either the entire twisted cable bundle, and/or in other cases, around each twisted pair. You can do a Google image search for "shielded twisted pair" or "STP vs UTP" to see what it looks like.

Anyone telling you they "can hear a difference" between this cable and a \$3 cable is either trying to sell you something at a ludicrous markup, or they're suffering from audiophile snobbery bias.

★★★★☆ **Cables fit for a god**

February 10, 2015

While AudioQuest "doesn't pretend to fully understand" how these cables work, it became clear to me the moment I opened the box and bathed in their holy light. Quite simply, God was awestruck at the quality of manufacturing that went into these cables, and the silver has been imbued with heavenly particles that enshroud my 0's and 1's and deliver them with angelic clarity.

To test their quality, I tried downloading a movie, only to realize that these cables are so fast they'd already downloaded and shown me the movie before I realized I wanted it. Still unimpressed, I decided to stream the London Philharmonic, and heard musical elements I never thought I could - who knew that the fifth violin was picking her nose in bars 57-60! Switching to some Nickelback, a bolt of lightning burst from the cables, transforming their CD in my collection into a first-press Led Zeppelin vinyl! Unfortunately, it was slightly scratched, so I'm only leaving 4 stars.

After experiencing the godly sound and networking enabled by these cables, I took out a third mortgage on my mansion so that I could buy them for every room. I even carry one around on my neck, to enable me to upload my

★★☆☆☆ **Crap! Wasteful idiotic if you buy this you deserve it.**

February 10, 2015

"In order to fabricate copper or silver into a strand or conductor, it is first cast and then drawn (squeezed through a die). Even finest high-purity metals have imperfections and grain structure, which due to the direction of casting and drawing become non-symmetrical structures without the conductor. In ways which are not fully understood, both analog and digital audio performance is significantly affected by these non-linearities. While AudioQuest doesn't pretend to fully understand this obvious distortion mechanism, the solution is understood 100%. Use the conductors in the direction which reduces distortion!"

What?

it's ethernet... Bi-directional [both ways at once] packet based [1's and 0's baby] communications...

The cable makes no difference in this case. If you buy this get a hold of me, I got a few more I will sell you for half as much! They are 10 feet long and the copper inside was made by drawing it through a die as well.it's coated in the highest quality PVC and the wires are twisted in to pairs!!

★★★★☆ **Pays for itself! Excelent Investment!**

February 11, 2015

Shortly after I connected this cable to my laptop I received an email from myself in the near future! Apparently this cable is so fast that I am able to send messages through time itself!

Good old me (old me, as he is from the future, and therefore older than current me) was smart enough to send me these weeks winning Powerball numbers!

Now that I am a millionaire I can finally move out of my parents' basement, or but that Sony TV I always wanted.

★★★★☆ **Better health AND more channels!**

February 26, 2015

I am clueless about all this new-fangled technology but I certainly know results when I see them. This cable brings results!

From the moment I heard the Amazon drone hovering overhead it was clear that my life had begun to change in ways that I couldn't begin to imagine. As I sat watching ESPN on my 32 inch Emerson flatscreen, I heard the faint whirring of the blades on that drone so naturally I looked up. Of course what I saw from the recliner was only the living room ceiling but, and here's where it begins to get interesting, when I looked back down the TV had grown to 96 inches AND it had a Sony banner on it! A bit bewildered and thinking I ought to lay off the hard liquor awhile I then heard the thump of the package hitting the front step. Imagine my surprise when the door swung open and in walked (yes, I said walked!) this amazing cable. It strolled right past me into the kitchen where it fetched me a beer and then proceeded to plug itself into my new Sony which then began to systematically scroll through the seven thousand channels I now receive despite having just the basic cable package!

It's been over a month now since that fateful day this wonderful cable came into my life and I've noticed significant improvements in my health as well including my cancer going into complete remission and my hallucinations becoming less frequent and vivid. While I can't say with any medical certainty that all of this good fortune is attributable to a cable I know that I'll never ever be without it!
