@Classic21 @RTBF votre certificat SSL sur le domaine qui sert au streaming radio n'est plus valide depuis aujourd'hui. C'est un certificat pour *.rtbf.be, mais il n'est pas utilisé pour les autres sous-domaines de [rtbf.be](#), apparemment.

The screenshot shows a browser window with a "Not secure" warning and a URL from radios.rtbf.be. A "Certificate Viewer" window is open, displaying the following information:

| Certificate Viewer: *.rtbf.be | |
|--|--|
| General Details | |
| This certificate has been verified for the following usages: | |
| Issued To | |
| Common Name (CN) | *.rtbf.be |
