

futurePrototype

Author

Copyright 2018 Alex Makas, radicalmonday <at> ljeu5 <dot> com, theme published under GPL-2.0+.

Concept/Process

A new design concept, featuring new clean logo ideas and a background with a hidden buster. Created in Inkscape SVG format.

Desktop Team Edit: This proposal included a new logo, which won't be used. To avoid confusion we have moved it to a [subpage](#)

Final Preview

I've decided to start making a theme using the default logo for now, but can make make a new logo version if needed. Download source data files for all the files in SVG/PNG at different sizes.

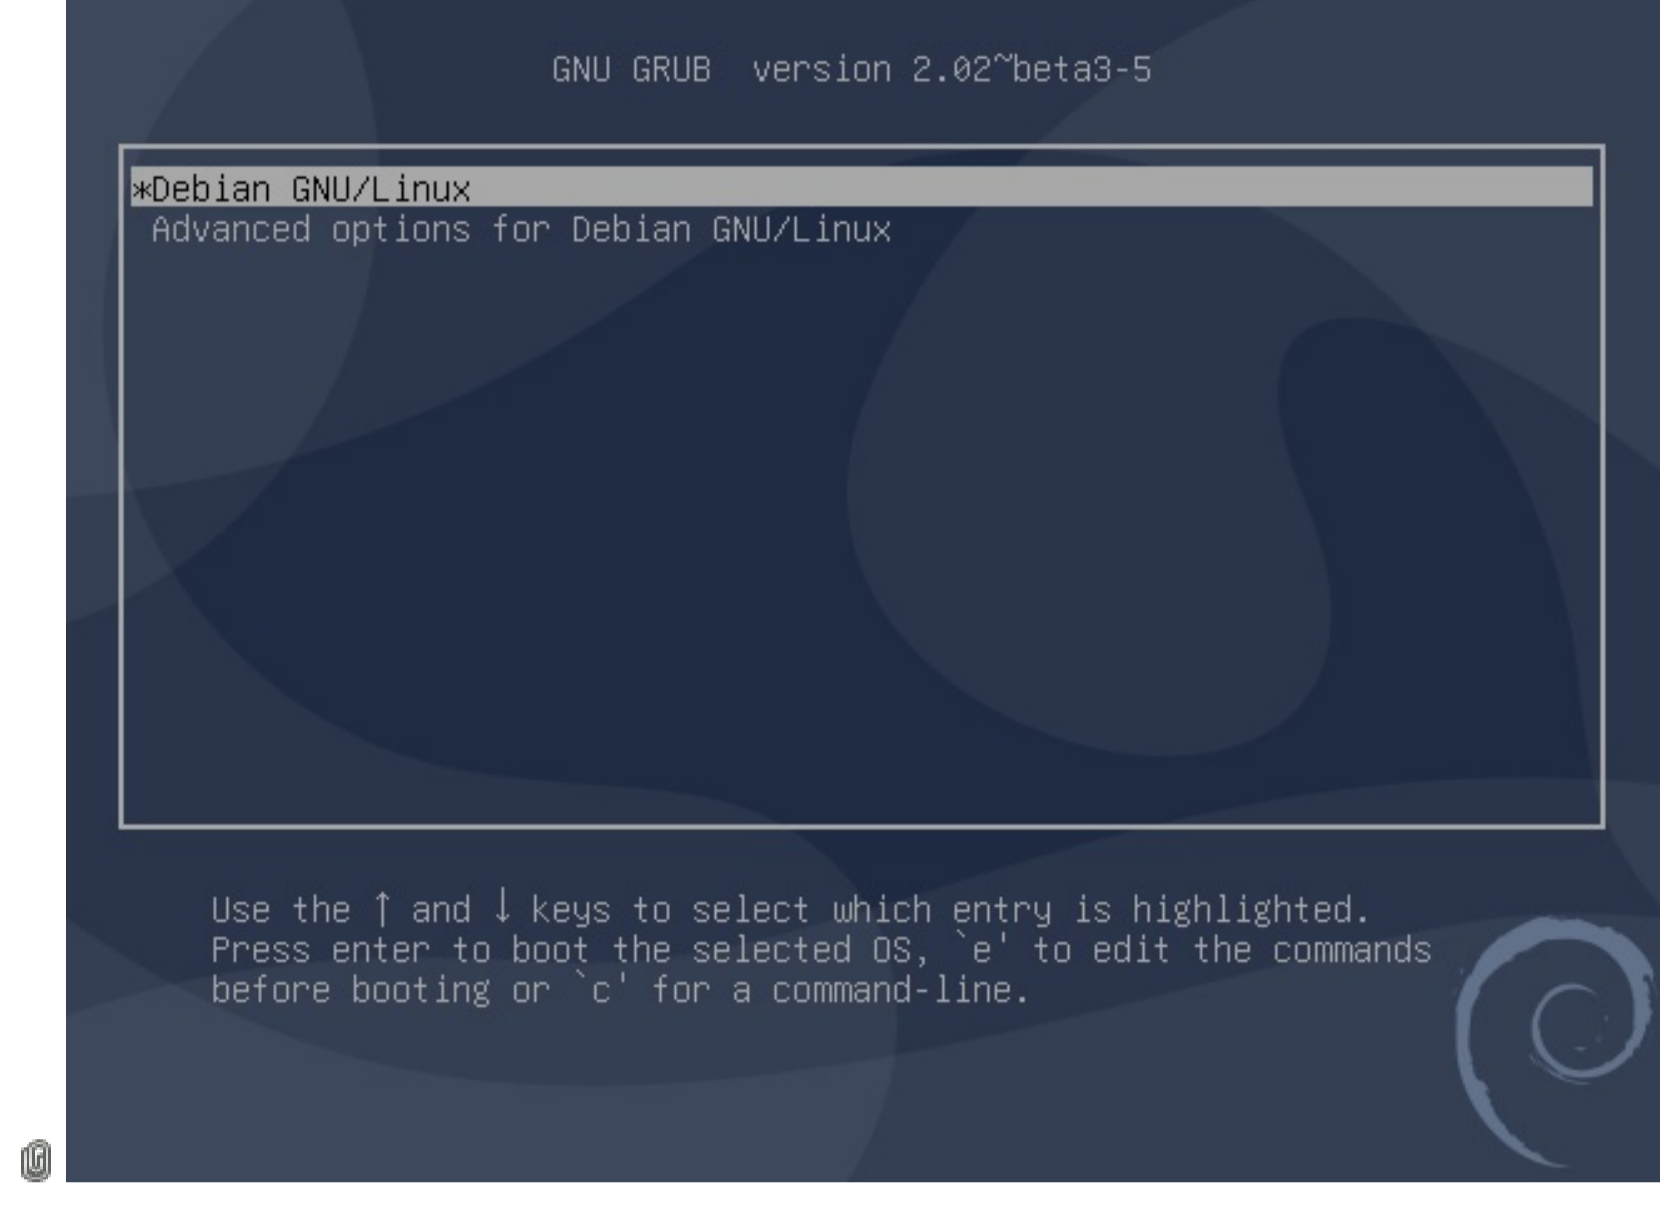

Wallpaper:

Login:

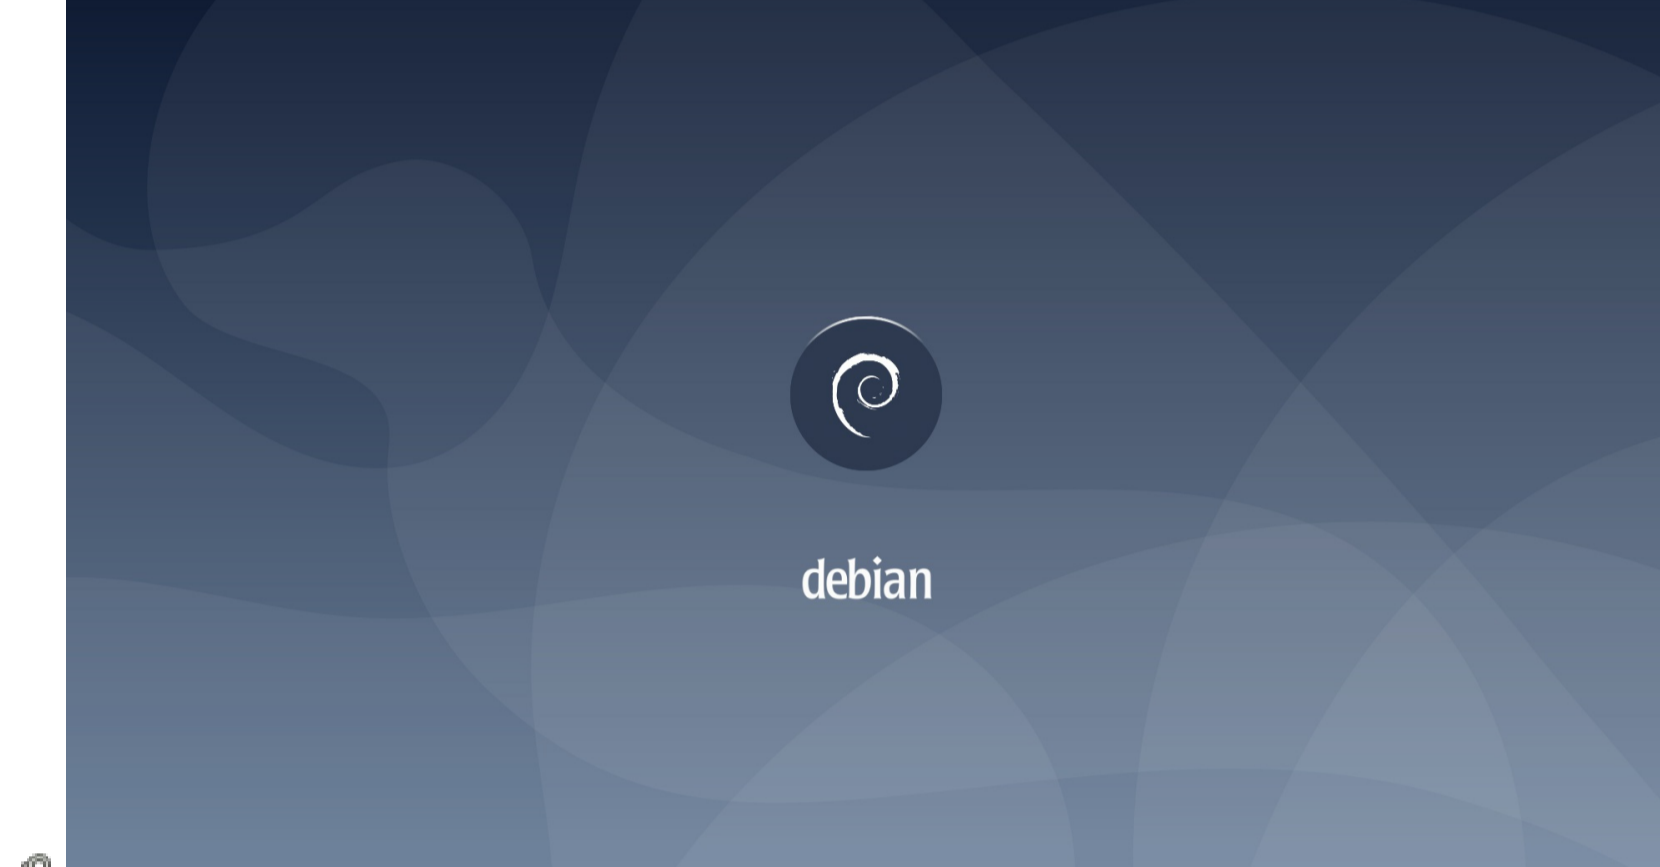

Boot Screen - Grub 2:

Boot Screen - Isolinux/Syslinux (untested):

Plymouth (based on ?SoftWaves, needs more testing?):

Installer:

CD/DVD:

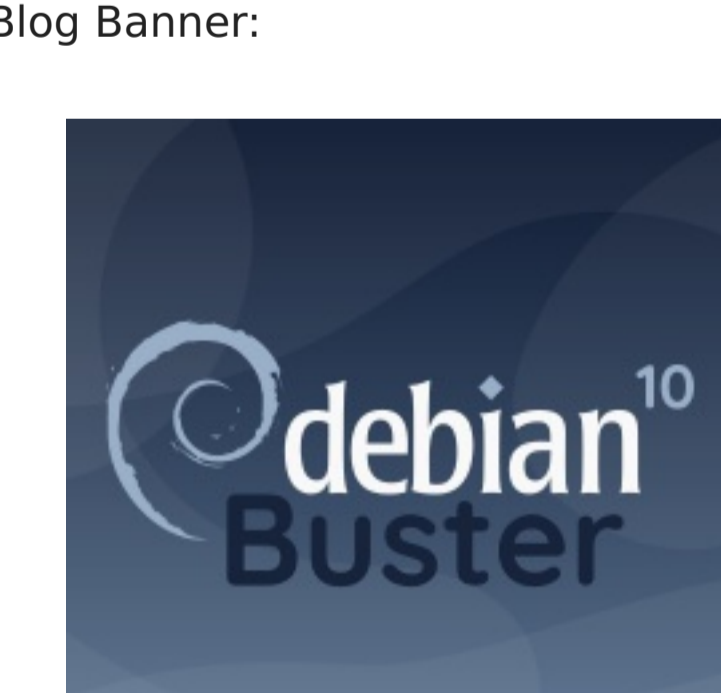

Website Banner:

Wiki Banner:

Blog Banner:

TShirt (shirt template from ?SpaceFun):

Stickers:

Source data

If mistakes are found adjustments are possible, please contact me.

[futurePrototype Source Data](#) source theme files in SVG with PNG output files

[futurePrototype Logos SVG](#) source SVG file for new logo designs

Font used in text elements is [Quicksand](#).

SVG Tips: Some elements, for example wiki banner transparent rounded corners background have an Object > Clip > Set in ?InkScape, needs to be Released for edits/size modification, otherwise typically Page Custom Size is used to restrict design elements as seen in Wallpaper & Login for different sizes.

Thank you to Debian User Forums, #debian on freenode, #debian-desktop on OFTC and Francesco Poli for suggestions and comments relating to the development of this theme.
