

# NEXUS CORE API (RESTLET 1.X PLUGIN)

## REST API (INDEX.HTML)

[REST \(rest.html\)](#) [Data Model \(model.html\)](#)

[Home \(index.html\)](#) > [REST \(rest.html\)](#) > [/artifact/maven/redirect \(path\\_\\_artifact\\_maven\\_redirect.html\)](#)

## /artifact/maven/redirect

---

Mount Point: </service/local/artifact/maven/redirect> ([./service/local/artifact/maven/redirect](/service/local/artifact/maven/redirect))

---

### GET

---

Emits HTTP redirects (or Not found) to the location of the requested artifact.

This resource never returns any content, only [HTTP RFC - 10.3.8 307 Temporary Redirect](http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.3.8) (<http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.3.8>) or [HTTP RFC - 10.4.5 404 Not Found](http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.4.5) (<http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.4.5>). The HTTP client accessing this resource has to follow the redirection to get to the content of the artifact.

Prior versions of this resource may have responded with an inappropriate [HTTP RFC - 10.3.2 301 Moved Permanently](http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.3.2) (<http://www.w3.org/Protocols/rfc2616/rfc2616-sec10.html#sec10.3.2>) instead of 307 Temporary Redirect.

### Parameters

| name | description  | type  | default |
|------|--|-------|---------|
| g    | Group id of the artifact (Required).   | query |         |
| a    | Artifact id of the artifact (Required).  | query |         |
| v    | Version of the artifact (Required) Supports resolving of "LATEST", "RELEASE" and snapshot versions ("1.0-SNAPSHOT") too. | query |         |
| r    | Repository that the artifact is contained in (Required).   | query |         |
| p    | Packaging type of the artifact (Optional).   | query |         |
| c    | Classifier of the artifact (Optional).   | query |         |
| e    | Extension of the artifact (Optional).  | query |         |

### Response Body

---

|              |                 |
|--------------|-----------------|
| element:     | (custom)        |
| media types: | */*             |
|              | application/xml |
