Can we soon look forward to a bandwidth increase to 500Mbit/s? 😄 (Elon asks if we want ½ gigabit and low latency internet on commercial passenger planes).

Yes, we are talking to airlines about installing Starlink. Please let them know if you want it on your airliner.

Low latency ~half gigabit connectivity in the air!

## STARLINK

Starlink has expanded and is now providing service across all of France!

You can check availability at your service address and learn more at [Starlink.com](https://starlink.com). If Starlink is at capacity in your area, you can place a preorder to hold your place in line for future service.
