úúú Release Notes : Did you know that a NFT is just a hyperlink [1] to an image thats usually hosted on Google Drive or another web2.0 webhost?

People are dropping millions on instructions on how to download images. That's why you can right click save-as because they are standard images. The image is not stored in the blockchain contract.

As web2.0 webhosts are known to go offline (404 errors) this handy torrent contains all of the NFT's so that future generations can study this generations tulip mania and collectively go...

"WTF? We destroyed our planet for THIS?!"
