Catena X Token Properties

Governance
Members of the community can vote, delegate and make part of blockchain history.

Burnable
This provides greater benefits to CEX holders by allowing the community to vote on limiting and controlling the number of tokens in circulation.

Mintable:
Essential feature to operate the bridge service between multiple blockchains.

Catena X DEX Features

Yield Farming
Stake CEX for high rewards.

Automated Market Maker (AMM)
Assets are traded in a permissionless and automatic way using liquidity pools instead of order books.

Bridge
The platform will provide a bridging service between multiple select blockchains with the ultimate goal of connecting most of the existing major blockchains.
