ACCEPT

The multi-device beta is currently available to people using the latest version of WhatsApp or the WhatsApp Business app on Android and iPhone.

Learn how to join the multi-device beta in [this article](#).

Unsupported features

These features aren't currently supported:

- Clearing or deleting chats on companion devices if your primary device is an iPhone.
- Messaging or calling someone who is using a very old version of WhatsApp on their phone.
- Using tablets.
- Viewing live location on companion devices.
- Creating and viewing a broadcast list on companion devices.
- Calling between Portals that have joined the Multi-Device Beta and Portals that haven't joined.
- Sending messages with link previews from WhatsApp Web.
