Observation astronomique d'un phénomène de double cannibalisme rare :

Une étoile a avalé un objet compact (trou noir ou étoile à neutrons) qui, à son tour, a englouti le noyau de l'étoile et l'a fait exploser.

[sciencenews.org](https://www.sciencenews.org)

Astronomers may have seen a star gulp down a black hole and explode
It took sleuthing through data collected by a variety of observatories to piece together the first firm evidence of a theorized cosmic phenomenon.
