

# Your Remote Desktop Software

## CUSTOMIZABLE

A remote desktop software, written in Rust. Works out of the box, no configuration required. You have full control of your data, with no concerns about security. You can use our rendezvous/relay server, or self-hosting, or write your own rendezvous/relay server. Download [source code](#).

Download

1.1.3 Ubuntu (>=16.04) (5MB)

[Download Server Software \(Optional\)](#)
