Manifestement, des UKR opèrent toujours à proximité de Mariupol.

#Ukraine: A Russian tank lost it's turret outside Mariupol on May 6th.

According to the original source (Chinese Phoenix Television), it was a T-72B3 & was taken out 6km from the "humanitarian corridor" in the city. Quite curious that area was still harassed by UA forces.

Comment ils identifient un T72b3 specifiquement ? En fonction de l'altitude qu'atteint la tourelle ? 🤔
