Red Hat, Inc. @RedHat

Red Hatters should be able to access healthcare no matter where they live. We're working with our U.S. benefits provider to reimburse associates and dependents covered by a Red Hat medical plan for travel to access several healthcare services that may not be available everywhere.

Effective July 1, 2022, our U.S. benefits provider will cover up to \$10,000 maximum (lifetime) in travel expenses for an associate and a companion if they must travel greater than 60 miles from their home to access in-network care.

The idea that employers will pay a female employees expenses to go kill a baby, so she can remain at work as a productive employee, is so much more dystopian than any of the handmaids tale fan-fiction.

Perhaps half the country, who believe (as all of Europe does), that there should be restrictions on abortion and you shouldn't be able to off an 8th month term baby, will decide that, no @generalmotors, not gonna buy your cars.
