

Adriane Reardon @adrianereardon

G'day @elonmusk, I'm a reporter at @abcnews that's been covering the discovery of @SpaceX debris in Australia. Just wondering, is anyone from your team coming to collect it? Here's a pic of one of the pieces 📷

For those wondering, here's the latest:

abc.net.au
SpaceX rocket remnants crash into sheep paddock, space agency confirms
The origin of space junk that left NSW sheep farmers scratching their heads has been confirmed as residents are told there could be more out there.

Personally, I'm concerned that removing the space monolith might slow down technological development in the Dalgety region
