

#Mobilization: List of 305,925 names comprising the 1st of presumably 3 waves of Putin's draft has been leaked. Pieces fitting together to further corroborate that 1 million people are intended for the draft, not 300,000.

Why hasn't U.S. started mobilization?

Even if the US actually goes to war with Russia (which isn't happening)... they simply don't need to

Of course the law never mentioned only 300,000 and gave full authority for total mobilisation of all men 18-65 (except of course sons of Peskov etc etc). This all smacks of desperation, last-minuteism, panic by Putin. It might be closer to the end than it seems.
