Twitter probably accelerates X by 3 to 5 years, but I could be wrong

What exactly does X do? Payments? Buying and selling? General economic infrastructure?

Watch the show "startup" on Netflix. It's an all in one app that you do everything in. Think web search, chat, payment, social media...all in one app. The premise is you only have the one app on your phone and don't need anything else.

Correct. China already has this (and, yes, it is very closely monitored by the government).

Sounds like the movie "Jexi" on Netflix. Don't want it! Don't want my phone running me!
