## About this app

SMS Backup & Restore is an app that backs up (creates a copy of) SMS & MMS messages and call logs currently available on the phone. It can also restore messages and call logs from already existing backups.

Note: This app requires existing backups to be able to restore call logs and messages. It cannot recover anything without existing backups.

The end all solution for the archival of SMS and call logs for Android OS. I have my logs sorted by phone number and year, with the Incremental backup option set to perform a full backup at the end of every month. Automatically uploads to Google Drive without fail. This has been working for me flawlessly for the last five years! The web site offers a couple different view options for reading your backups. Slow when reading more than ~5000 messages in a file, so break it up.

Careful! The "default behavior" for this app, if left un/misconfigured, will drain your whole battery by doing cloud backups every time you connect to wifi. By default the app will also fill up your phone with an unnecessary unrequested local backup copy that you had no idea even existed. Took me about 3 months of problems before I figured out that I have to do more steps than just add a cloud account. The potential for battery drain was never clear in the settings.

I used to use this app on my prior phones but once again the message restore feature in Android didn't work going from my Pixel 6 to Pixel 8 and I used this again but nothing restores. Not only that but it's also incredibly slow and the delete function doesn't work. This seems completely hacked at the knees in the new Android version and I'm curious if it'll ever work.
