Bridge NPCs!

Fri, June 27, 2025

[See all updates \(Latest: Jul 18\)](#)

There are many great space sims out there. Some feature beautiful ship interiors, some have stunningly realistic galaxies, and others have impressive simulated ship systems. There's even software that allows you to soar through the cosmos seamlessly without any loading screens, but what the space sim genre lacks is a title that features all of the above.

Until now, that is...

Welcome to **Starship Simulator**, a deeply immersive space exploration sandbox that combines fully simulated, realistically designed starships with a full-scale Milky Way galaxy, driven by real astrophysics. Watch the stars drift by in real-time as you venture out into the vast unknown reaches of space, all while quietly sipping a drink in your starship's luxurious officer's lounge.

While exploring space your ship will require fuel and maintenance, and the 200+ crewmembers will require food and healthcare. Both players and the NPC crew alike will need to perform role-specific tasks to ensure the ongoing needs of the ship and her crew are managed successfully.
