

Fucks Given

Self-love is the greatest middle finger of all time.

New in version 1.0.8

- 🐛 Bugfixes
- ⚙️ Dependency Updates
- 🌐 Translation Updates

A huge thank you to all contributors and translators. 🙏

Feel welcome to report issues and submit fixes on <https://github.com/Crazy-Marvin/FucksGiven/> or translations on <https://hosted.weblate.org/engage/fucks-given/>. 🚀

Fucks Given lets you keep track of the things that made you care. Whenever something happens that you needlessly concern yourself with, jot it down with a tap. The app creates a chart of how many fucks you've given, so you can work to give none.

Fucks Given allows you to back up your data and has a beautiful dark mode that can turn on automatically, following the system theme. It even works on your smartwatch.

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 1.0.8 (9) suggested Added on Oct 27, 2025

arm64-v8a armeabi-v7a x86 x86_64

This version requires Android 8.0 or newer.

It is built by F-Droid and guaranteed to correspond to [this source tarball](#).

▼ Permissions

view network connections

Allows the app to view information about network connections such as which networks exist and are connected.

run foreground service

Allows the app to make use of foreground services.

read the contents of your shared storage

Allows the app to read the contents of your shared storage.

run at startup

Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.

use biometric hardware

Allows the app to use biometric hardware for authentication

use fingerprint hardware

Allows the app to use fingerprint hardware for authentication

prevent phone from sleeping

Allows the app to prevent the phone from going to sleep.

modify or delete the contents of your shared storage

Allows the app to write the contents of your shared storage.
