About this item

- Navigation par Trackball
Contrôlée par le Pouce : Naviguez facilement en utilisant votre pouce sur cette souris sans fil, réduisant les mouvements de la main et du bras. Aidant à minimiser la tension et la fatigue, cette souris de bureau est parfaite pour de longues heures passées au bureau.
- Support Incliné
Ergonomique : Cette souris ergonomique sans fil est livrée avec un support incliné à 21,7° pour une position du poignet plus naturelle. La souris PC surélevée et inclinée épouse parfaitement votre paume, offrant une prise en main plus confortable et sans effort.
- Contrôle Vraiment Silencieux : Profitez d'une utilisation totalement silencieuse avec cette souris silencieuse sans fil. Du trackball à chaque bouton et molette de défilement. Idéale pour les espaces partagés, le travail de nuit ou toute personne qui valorise une concentration totale sans distractions.
- Connexion Multi-Appareils : Cette souris Bluetooth se connecte via Bluetooth ou via le récepteur USB inclus. Apparez jusqu'à 3 appareils et basculez instantanément d'un simple bouton — sans besoin de réappairage pour un flux de travail fluide. Compatible avec PC, Mac, ordinateurs portables, tablettes et téléphones.
- 4 Niveaux DPI Réglables : Choisissez parmi 4 niveaux de sensibilité (400/800/1200/1600 DPI) pour un contrôle précis ou un mouvement plus rapide. Cette souris trackball est idéale pour le dessin, l'édition, le multitâche sur différents écrans et le travail de bureau quotidien.
- Travaillez Nimporte Où, Sans Effort : La navigation par trackball vous permet de travailler avec précision sur toute petite surface, comme une petite table de café, un plateau de siège d'avion ou votre canapé à la maison. Aucun besoin d'espace supplémentaire ou de tapissoirs. Cette souris sans fil pour ordinateur portable et PC est votre compagnon de travail fiable.

Good mouse, some great design.

Amazon Vine Customer Review of Free Product ([What's this?](#))
Arrived as part of the Amazon vine review programme. This review is for the Nulea M511 Wireless Trackball Mouse, Rechargeable Ergonomic Thumb-Control Mouse.

A great multi device trackball mouse.

Pros:
Incredibly comfortable to use, don't get me wrong, you won't be gaming on this but for surfing and general use (over long periods) it does make a massive difference to the usual aches and pains.
The mouse buttons and finger rest areas are the perfect places, it really feels natural to rest your hand on this device.
DPI is easily switchable (and works fine) using the now standard DPI middle switch. Very good steps in DPI - for those working on design packages requiring more finite movement.

Smooth and ergonomic trackball mouse that feels precise from the first movement
Reviewed in the United Kingdom on 28 November 2025
Amazon Vine Customer Review of Free Product ([What's this?](#))
I started using this trackball mouse straight away and the precision was noticeable immediately; the ball rolls smoothly with very little effort, and the cursor tracks accurately across the screen. The shape supports the hand naturally, reducing wrist movement and making longer sessions more comfortable.
The buttons have a crisp click and the scroll wheel feels controlled and steady. Wireless pairing takes only a moment, and the connection remains strong without lag. It's extremely handy for tight desk setups or for reducing strain during extended computer use.
A thoughtfully designed mouse that combines comfort, accuracy and effortless control.

If you like your MX Ergo flat
Reviewed in the United Kingdom on 27 November 2025
Amazon Vine Customer Review of Free Product ([What's this?](#))
Although the box shows a red ball, the actual one inside is indeed blue.

The design is obviously 'inspired' by the Logitech MX Ergo trackball. Compared to that, the body is smoother. It may not help your hand to stay in the right place, but it should also pick up less dirt from it and be easier to clean if it does. The buttons are quiet, like the later MX Ergo S. There is slightly less resistance to the movement of the ball, but not ludicrously so as with an Elecom one I've tried.

The main difference is that the MX Ergos switch between their two angles, 0 and 20 degrees, via flipping between how they rest on a thin metal plate. I slightly prefer the latter angle. To get to its 21.7 degrees (why the difference?) this one has a silicone stand that weighs almost as much as the trackball itself. It has depressions for the non-slip pads on the bottom of the trackball and a bump that fits neatly in the hole used to push the ball out for cleaning. It's

Bit of a learning curve
Reviewed in the United Kingdom on 27 November 2025
Amazon Vine Customer Review of Free Product ([What's this?](#))
First impressions of this are that compared to a standard mouse, this is huge - like, 1/3rd bigger than an average mouse. However, you also need to remember that you don't actually move it and it simply sits there. All the controls felt as responsive as I would want them to be (although to be nitpicky, the mouse buttons aren't actually "silent" as claimed - they make a very quiet, muted clonk, but it's audible). Out of the box, it connected up immediately to Windows 11 via Bluetooth, and simply worked as expected. The controls are all located where you'd expect on a normal mouse (except that it stays put on your desk), and a wireless dongle is stored in the bottom of the mouse itself.

But. There is a serious learning curve here. The instinct to move your hand and the whole mouse remains powerful for routine mouse-users like me, and it takes quite a bit to get over it and start using your thumb instead. Thus, you may want to spend some time deciding if this is your preferred way of interacting with desktops, although the entry price here is pretty reasonable.

Not for me
Reviewed in the United Kingdom on 27 November 2025
Amazon Vine Customer Review of Free Product ([What's this?](#))
I wanted to give a trackball mouse a try, but this one just didn't suit me. It feels quite light and plasticity in the hand, and I couldn't get comfortable using the trackball for movement. I found myself fighting the instinct to move the mouse normally, and after a short time I switched back to my old one. It's probably fine if you already like trackball-style mice, but it wasn't a good fit for how I work.
