

Jolla is a Finnish company specializing in privacy-first OS and Edge AI solutions. Founded in 2011, we continue the legacy of Nokia and MeeGo, driving mobile innovation into the human-centric AI era.

We develop Sailfish OS, the only European mobile OS, trusted globally for over a decade, and now enhanced for AI-driven applications. Our AppSupport technology enables Android™ apps to run on Linux platforms. Our privacy-focused Jolla Mind2 AI computer delivers secure AI capabilities across industries.

With over 60 successful software release deliveries and a proven track record across multiple hardware platforms, we collaborate with partners in the automotive and telecommunications sectors to drive innovation with our OS and Edge AI technologies.
