The Venezuelan people are today rid of Nicolás Maduro's dictatorship and can only rejoice.

By seizing power and trampling on fundamental freedoms, Nicolás Maduro gravely undermined the dignity of his own people.

The upcoming transition must be peaceful, democratic, and respectful of the will of the Venezuelan people. We wish that President Edmundo González Urrutia, elected in 2024, can swiftly ensure this transition.

I am currently exchanging with our partners in the region.

France is fully mobilized and vigilant, including to ensure the safety of its nationals during these uncertain times.

Macron always stresses the EU's diplomatic autonomy. The truth is, he himself doesn't have independent thoughts and can't say words inconsistent with America.

I think you need to have a talk with your foreign minister:
"The military operation that led to him being grabbed contravenes the principle of non-use of force, which underpins international law." French Foreign Minister Jean-Noel Barrot writes on X.

France calling this "a victory for freedom," explains perfectly why, when the U.S. kidnapped Alstom's executive, Paris didn't protest, it submitted.

Empires that once abducted kings never learned to defend their own.

Par son soutien à l'agression militaire de Trump et à l'enlèvement d'un chef d'État souverain, Emmanuel Macron entérine un nouvel état du monde fondé sur la brutalité impérialiste et l'arbitraire des puissances.

La France a capitulé face aux fossoyeurs du droit international.

España no reconoció al régimen de Maduro. Pero tampoco reconocerá una intervención que viola el derecho internacional y empuja a la región a un horizonte de incertidumbre y belicismo.

Pedimos a todos los actores que piensen en la población civil, que respeten la Carta de Naciones Unidas y que articulen una transición justa . Non rien ... la voix de la France est devenue si faible .

No word on the illegitimate behavior of the US while invading Venezuela and abducting its President and his wife?

Whether you believe or not that Maduro is a horrible dictator and not legitimately electrd, the fact is that with this attack on a sovereign country, the US again showed its contempt for international law.

Bombing a sovereign nation and kidnapping the President is the behaviour of a cowboy state.

The United States' attack on Venezuela is illegal — and it is utterly shameful that the UK government refuses to condemn this reckless act of war.
