Overview

AGI is analogous to CGI in Apache. AGI provides an interface between the Asterisk dialplan and an external program that wants to manipulate a channel in the dialplan. In general, the interface is synchronous - actions taken on a channel from an AGI block and do not return until the action is completed.

AGI Libraries and Frameworks

Name	Language	Website	Protocols
Adhearsion	Ruby	http://www.adhearsion.com/	AMI/FastA
Asterisk-Java	Java	https://asterisk-java.org/	AMI/FastA
PAGI	PHP	https://github.com/marcelog/PAGI	AGI
PHPAGI	PHP	http://phpagi.sourceforge.net/	AGI
Panoramisk	Python+AsyncIO	https://github.com/gawel/panoramisk	AMI/FastA
Pyst2	Python	https://github.com/rdegges/pyst2	AMI/AGI
StarPy	Python+Twisted	https://github.com/asterisk/starpy	AMI/FastA
Nanoagi	C++	http://sourceforge.net/projects/nanoagi/	AGI
