Which sausage? I don't see any sausage.

This is clearly Finnish blood sausage, also known as mustamakkara.  
  
You're supposed to eat it with lingonberry jam and mashed potatoes. Op has neither on their plate.  
  
It's a tasty dish but clearly the sausage in the picture looks dry and unappetizing.

This looks worse than food that would give the player character radiation poison and negative side effects in a \*Fallout\* game.
