How does it work?

Write your content as markup with a focus on structure. No distractions.

Introduction
Our concept suggests three ways that A-Mail can be best utilized.

- First is to reduce the probability of failure of a space mission. This problem is known as the Mars problem and suggests problems with human communication.

```

)
```

Pick a template, create your own, or just start writing. All the formatting happens automatically.

Export as a PDF, image, or a website (in preview), without touching your markup.

Different documents have different needs. Typst supports common types of content out of the box while giving you the power to build the rest.

Visualizations. No matter whether a Gantt chart or an arrow diagram: Visualizations always stay up-to-date with your data.

Mathematics. With beautiful equations as a first-class citizen, Typst is ready for research.

Wield limitless power

Free content and scripting to make your documents reactive. In the realm of a Typst document, there is nothing you can't automate.

```
With built-in syntax for the most common document elements, Typst markup is designed to be pleasant to write and read:  
- *Strong & _normal_ emphasis  
- Math: $a, b in {1/2, sqrt(4 a b)}$  
But that's just the surface!
