

Home Assistant Connect

# ZBT-2

The easiest way to start with  
**Zigbee** or **Thread** is now even  
better.

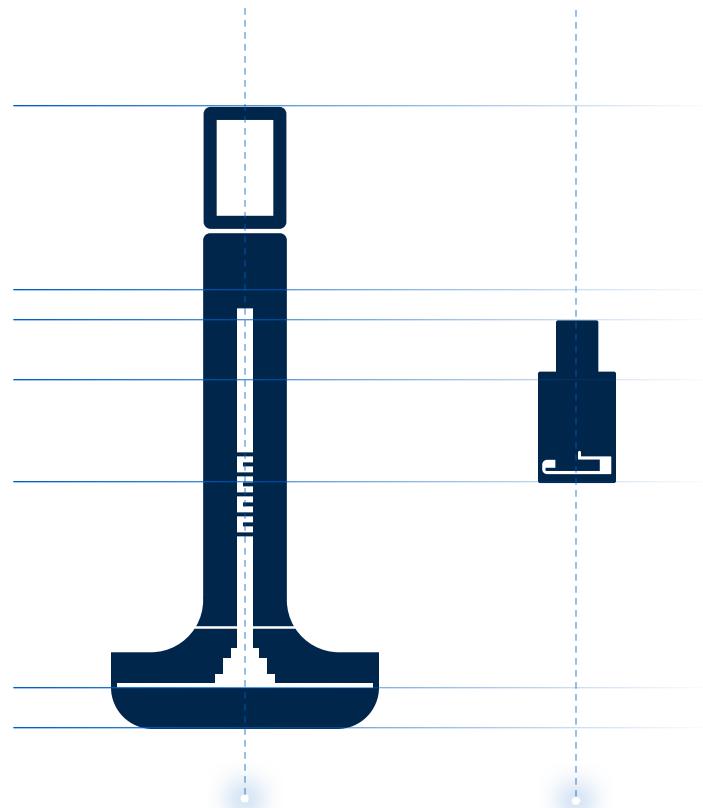

Designed and built by

THE BEST JUST GOT BETTER

# Precisely engineered

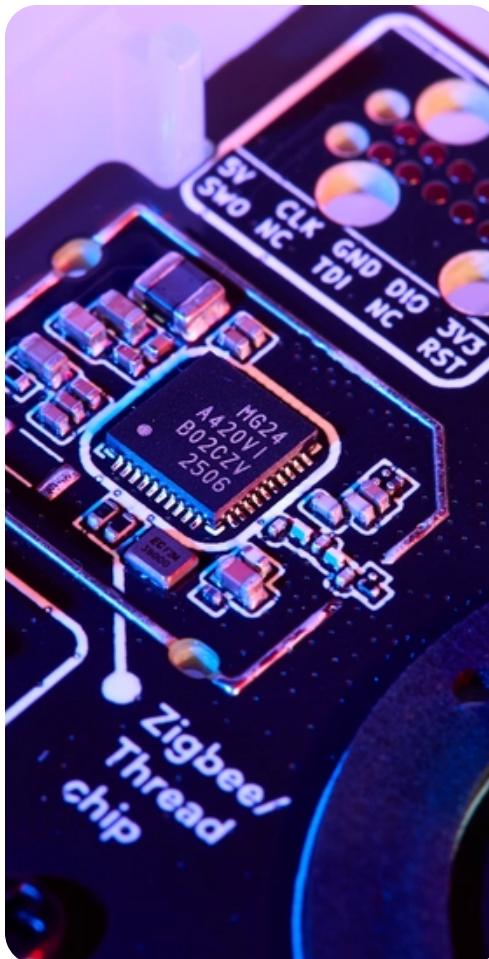

Optimized antenna providing the best possible connection to Zigbee or Thread devices. Along with opening up a world of Matter devices.

MG24

## Updated internals

An updated Zigbee and Thread chip gives it the highest performance available, while providing a rock-solid, stable network.

## Second generation platform

After introducing ZWA-2, our Connect line continues to grow with the addition of the ZBT-2.

It may be smaller than its [older brother](#), but it shares the same second generation design, delivering peak performance, an open platform, and a look that blends seamlessly into any home.

### More responsive

A 4x improvement in adapter speed consistently improves device responsiveness.

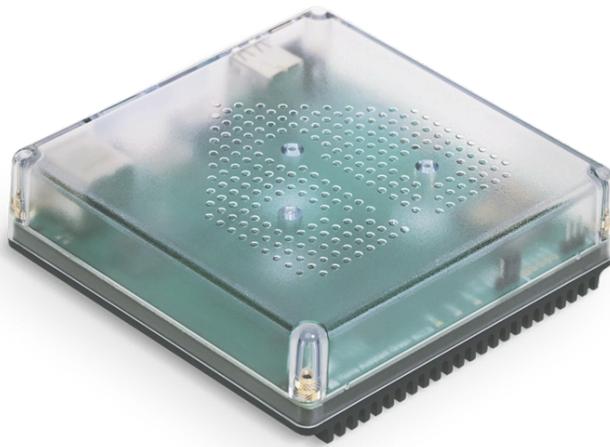

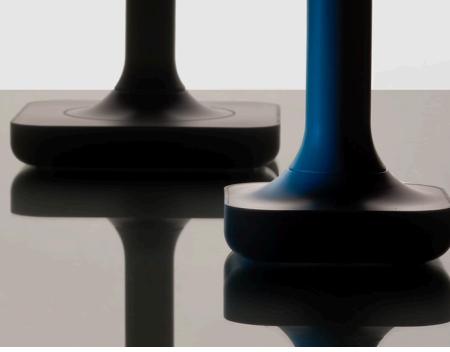

### ZBT-1

ZIGBEE OR THREAD MADE SEAMLESS

## Built for Home Assistant

Designed by the team driving forward Home Assistant, ZHA, and Matter.js.

## Plug and play

- The easiest way to get started with Zigbee or Thread, thanks to our intuitive start-up wizard and one-click updates.
- Seamlessly migrate your Zigbee or Thread network.
- Start up a new network in mere minutes by dedicating your Connect ZBT-2 to either Zigbee or Thread.

Brought to you by

## Every purchase supports the Open Home

Nabu Casa designs and builds official Home Assistant hardware. As a commercial partner of the Open Home Foundation, Nabu Casa contributes the majority of its profits to the foundation. This means every purchase supports the development of projects like Home Assistant and ESPHome.

\*Recommended MSRP. Prices differ between regions due to varying local market costs and conditions, and subject to individual retailers.

TAKE BACK YOUR SMART HOME

# Cut the clutter

Directly connect the Zigbee, Matter or Thread devices you already have (including Hue, IKEA Trådfri, and more!) to Home Assistant.

## Choose what's best for your home

Connect ZBT-2 gives you the flexibility to run either a Zigbee or Thread network. Even though you need to select one, both technologies give devices a local connection, longer battery life, and reduces the strain on your home Wi-Fi.

THREAD

ZIGBEE

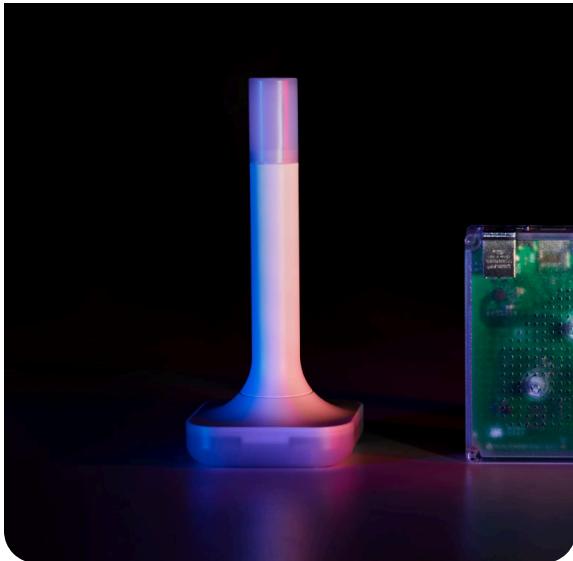

Thread has  
a big future

Thread is the latest smart home  
communication technology.

allowing you to directly connect a wide range of Matter devices.

Home Assistant is Matter certified.

OPEN DESIGN

## Built to be tinkered with

Unlocked, open source, and easy to open. No clips or glue, with accessible pads and pins.

Designed for

# the home

From its injection-molded case, to its sleek lines, it's designed to blend into home decor.

## Specifications

### Dimensions and weight

Device	With box
83x83x179 mm	227x168x42 mm
157 g	350 g

### Material

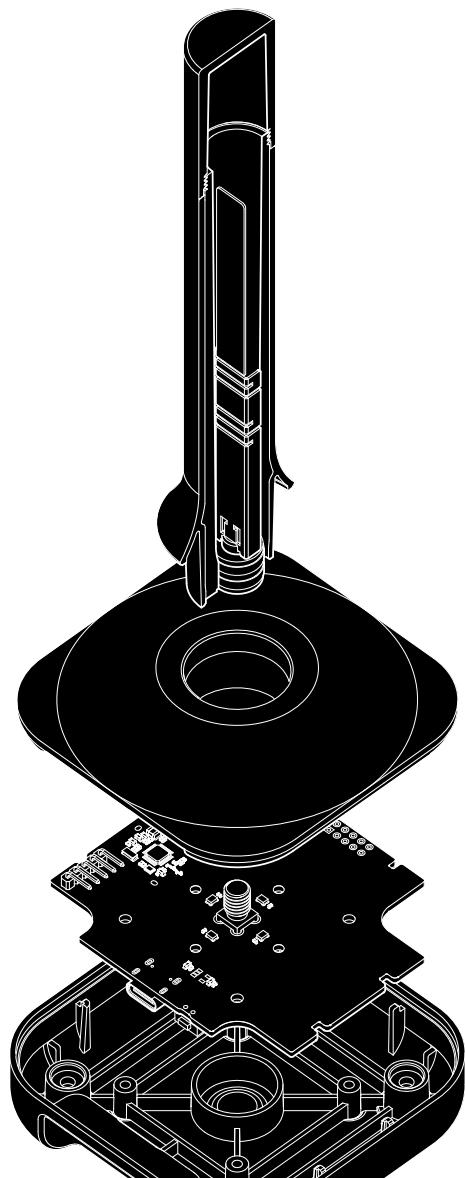

Enclosure	Colors
Polycarbonate plastic	White and semi-transparent

### Product details

SoCs	Power/data
Silicon Labs MG24 ESP32-S3 (USB-serial bridge)	USB-C, 5 V DC, 500mA

### Supported protocols

Zigbee 3.0, Thread

## Antenna characteristics

Different building materials and placement of the unit will affect the wireless connectivity range.

### Frequency range:

2400-2483.5 MHz

### Peak gain:

4.16 dBi

### Transmit power:

10 dBm (Europe)

8 dBm (rest of world)

### Radiation pattern:

Omnidirectional

### Antenna dimensions:

24 mm diameter, 164mm height

## Environmental conditions for operation

Indoor use only

0 °C to 65 °C (antenna -40 to +85 °C)

32 °F to 149 °F

Humidity: non-condensing

Keep in dry, not excessively dusty environment as this can cause damage to the unit

Do not leave the unit in direct sunlight or near any heat source, as this can cause overheating.

## In the box

Antenna + Base

1.5m USB-C cable (USB 2.0/3.0)

Quickstart guide

Warranty and Safety Information

# Got some questions?

What's the difference between Connect ZBT-1 and ZBT-2?

Does Connect ZBT-2 work with Zigbee2MQTT?

Why do I have to choose between Zigbee and Thread? Why not both?

Can I migrate from my old adapter?

Why are you not using Power-over-Ethernet (PoE)?

What devices is it compatible with?

---

Does Connect ZBT-2 work with Matter?

---

Can Connect ZBT-2 be used as a repeater?

---

Can I use Connect ZBT-2 as a Thread border router separately from Home Assistant?

---

Why is Connect ZBT-2 so big?

---

Will you be supporting Zigbee 4.0?

---
