

# 10 Crazy Steering Wheels We Want to Wrap

June 16, 2025 By Nadeem Muaddi

Lancia Orca performance steering wheel.

So you think you're good at wrapping steering wheels, huh? Well then try wrapping one of these bad boys...

For as long a there have been cars, automakers have experimented with steering wheel configurations aimed at enhancing performance and ergonomics. Sometimes, those experiments have resulted in strange designs, especially on concepts and high-end supercars. Still, as trimmers, we're inclined to want to wrap them all. Here are 10 of the craziest ones we'd love to try:

## 1. Oldsmobile Incas

## 2. Lancia Stratos Sibilo

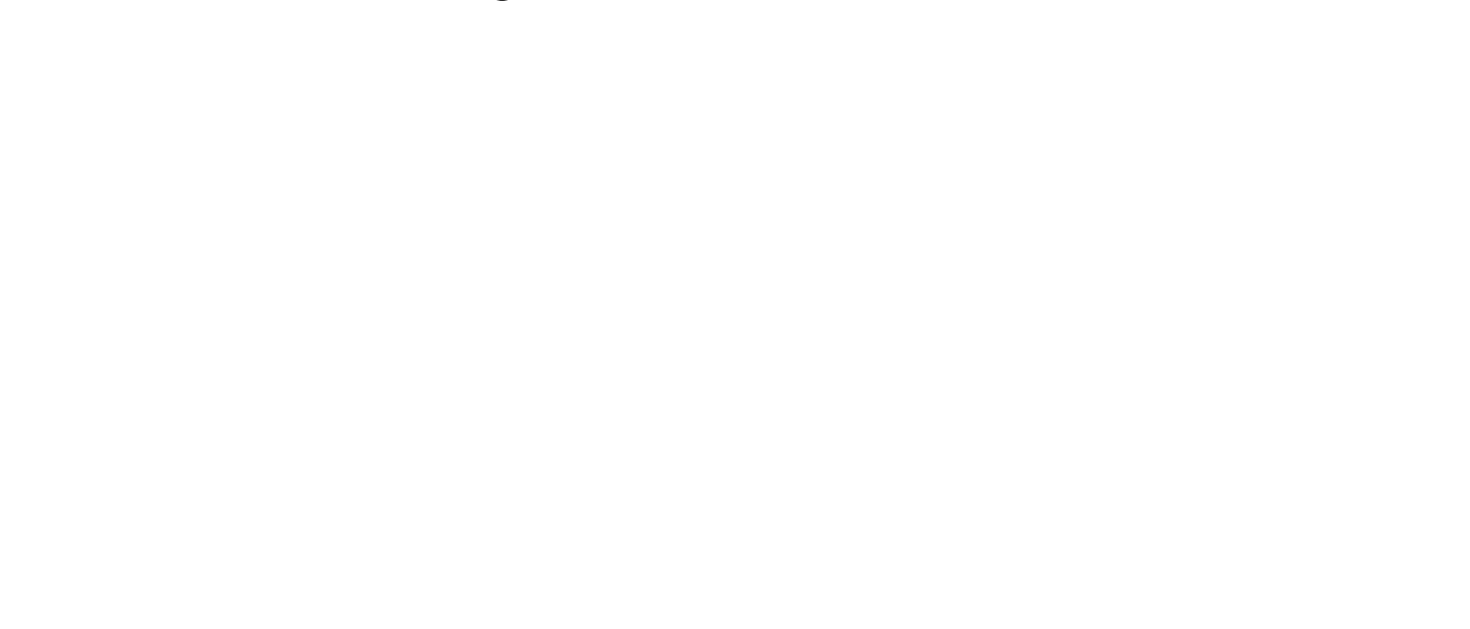

## 3. Aston Martin Lagonda

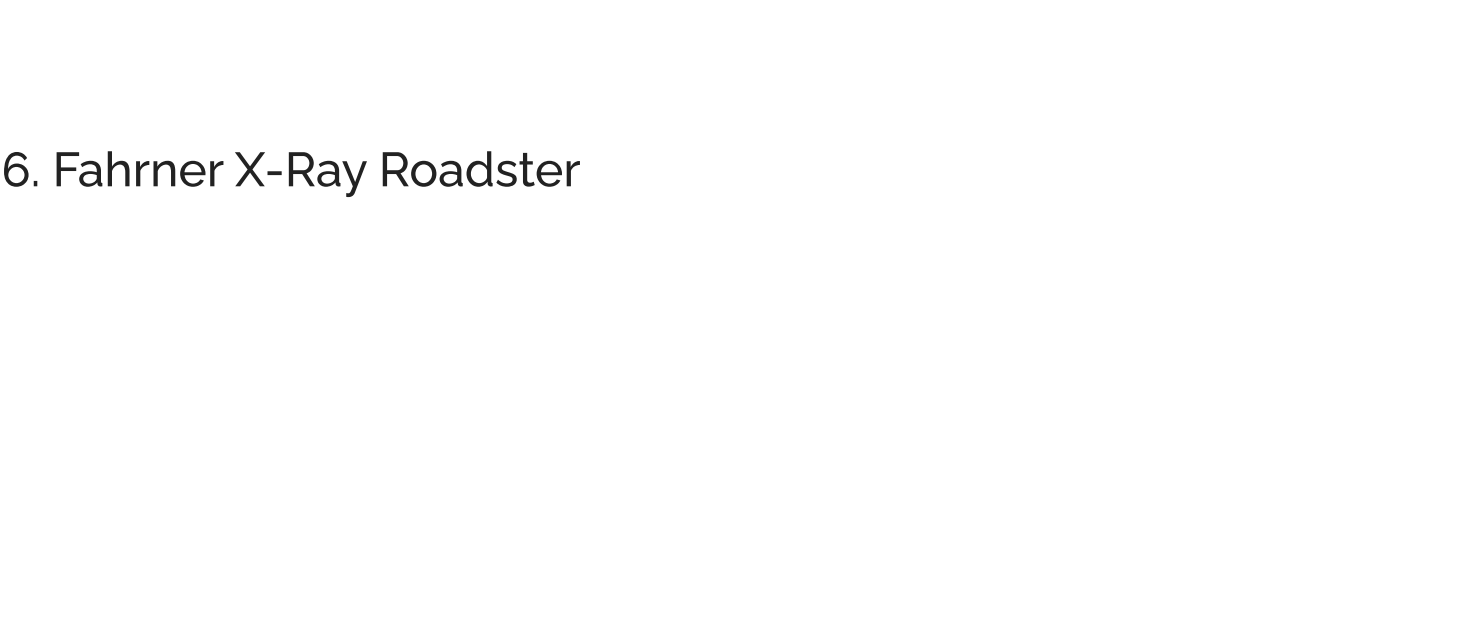

## 4. Citroen Karin

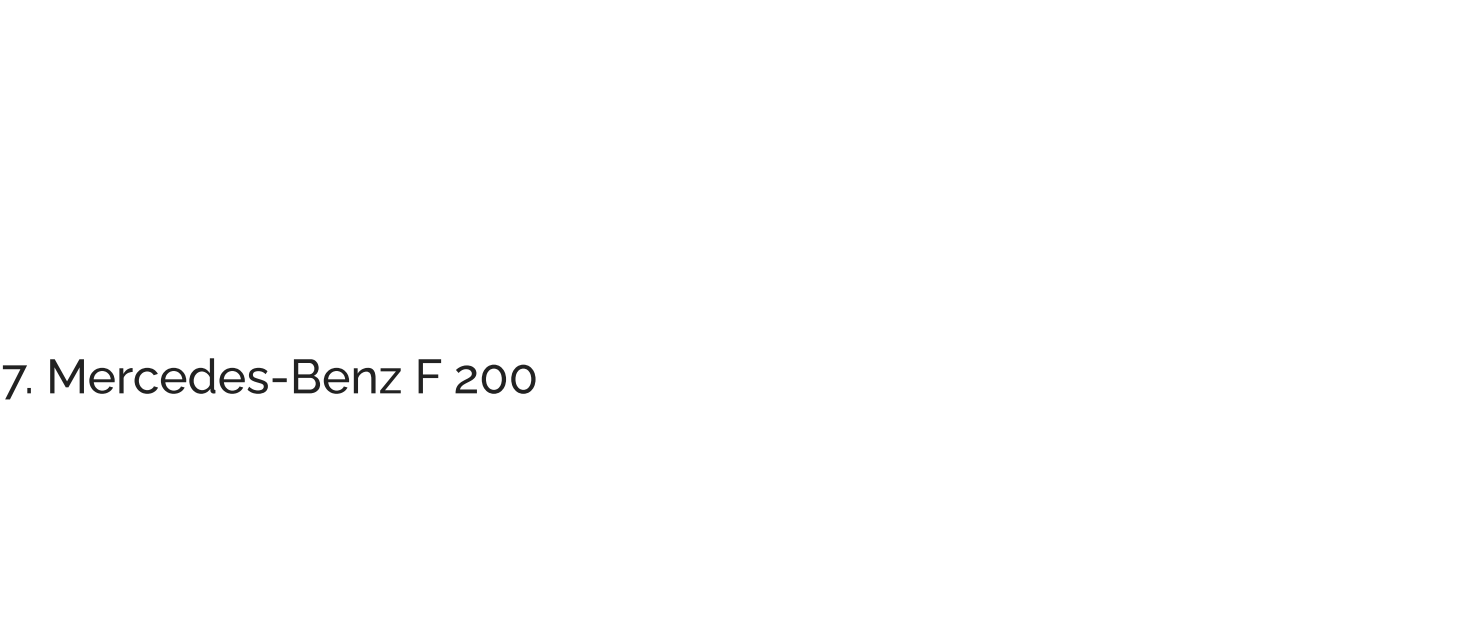

## 5. Maserati Boomerang

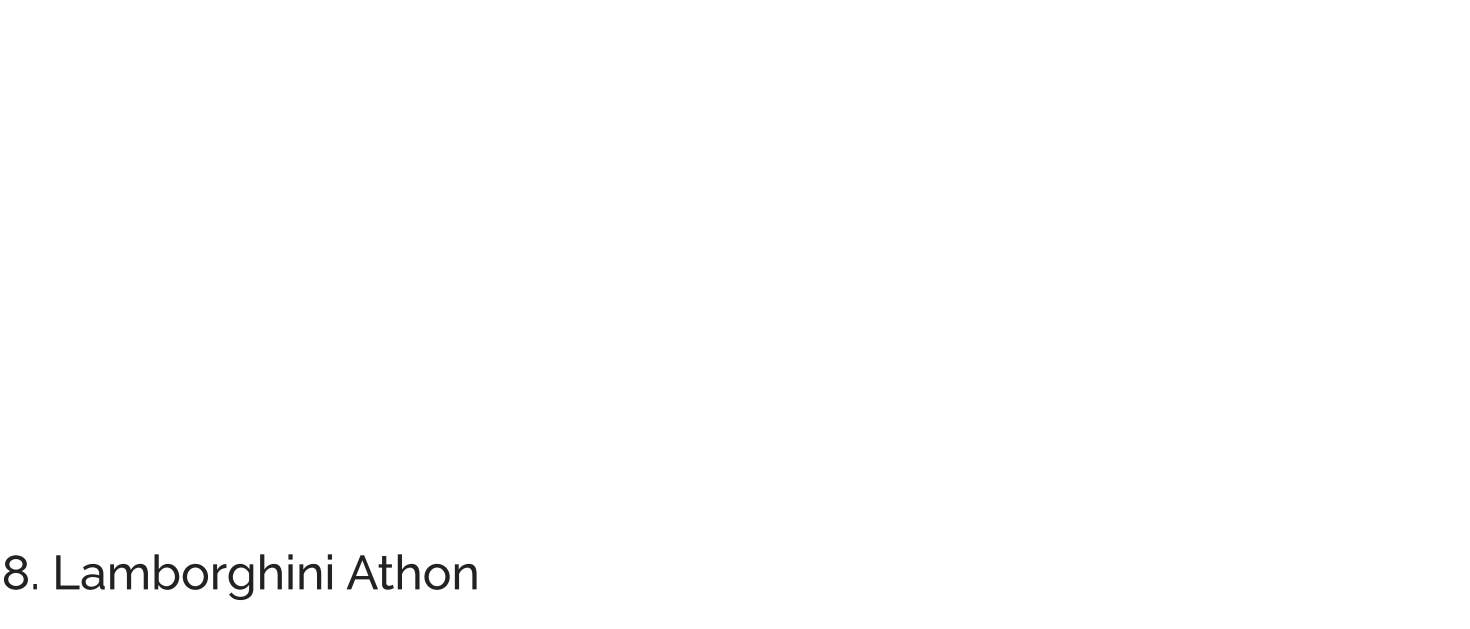

## 6. Fahrner X-Ray Roadster

## 7. Mercedes-Benz F 200

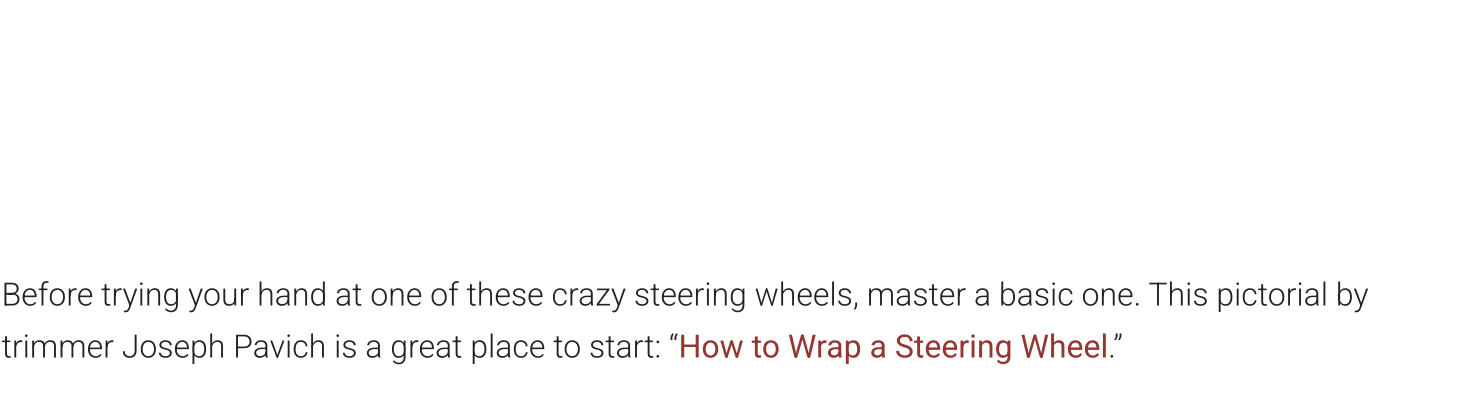

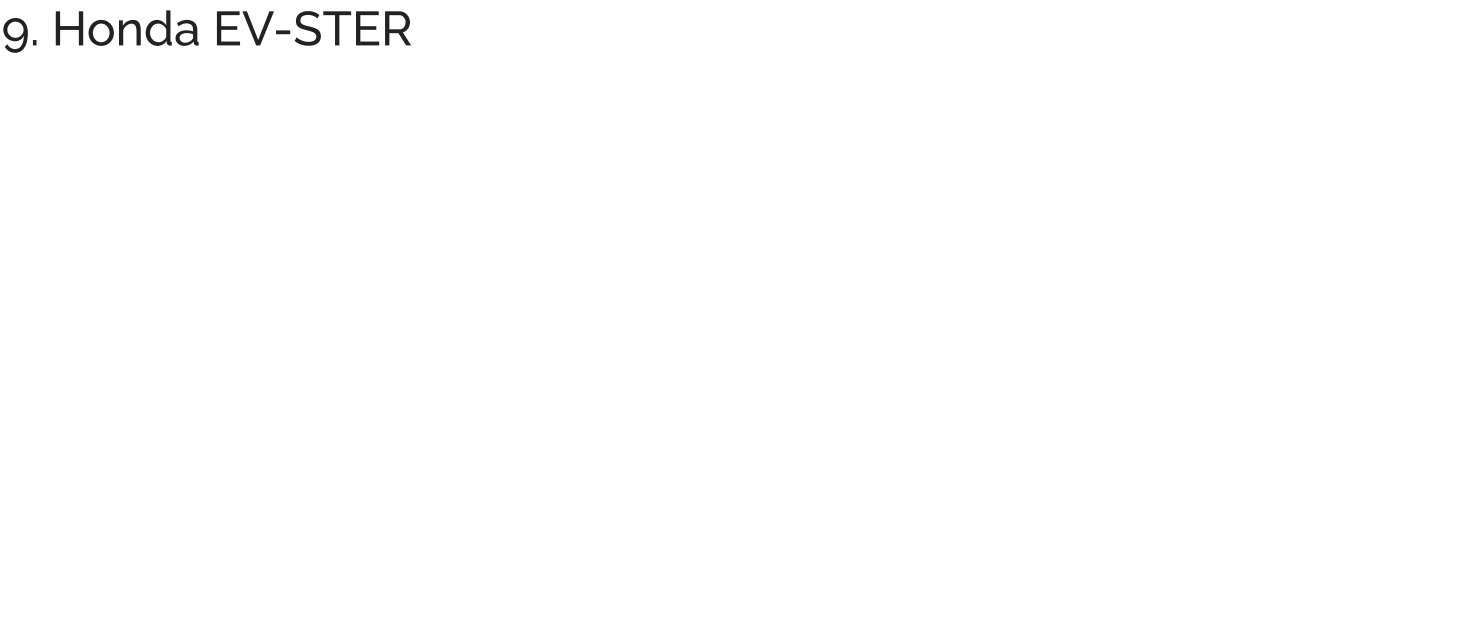

## 8. Lamborghini Athon

## 9. Honda EV-STER

## 10. BMW Z22

Before trying your hand at one of these crazy steering wheels, master a basic one. This pictorial by trimmer Joseph Pavich is a great place to start: ["How to Wrap a Steering Wheel."](#)
