PostgreSQL Playground

This app is client side apps (no server or login required) powered by [PGLite](#), a wasm port of postgresSQL. All processing is done in the browser and persistent data saved in indexedDB, so your data stays private. you can use this project as learning tools for postgresSQL without worrying about data and setup the DB.

Features

- Query Playground
- ERD Schema generator
- Query History
- Mobile Responsiveness
- Persistent Data
- Export query result
- [Import Data](#)
