Data Center

[Community Hub](#)

Build, cable, and automate. Assemble racks, servers, and switches, connect enough capacity for each app, earn money from processed data, and unlock gear and bigger customers with XP and reputation. Follow colored data packets as your center comes to life.

About This Game

Build, cable, and grow a living data center from the ground up. Start with bare floors, buy racks, servers, and switches, then physically place and stack your hardware the way you want. Run Ethernet between ports to shape your network by hand and watch data spring to life: every customer's traffic appears as colored packet-balls rolling along your cables, revealing bottlenecks, idle links, and beautifully tuned throughput at a glance.
