Q&A

Q1 : Que dois-je faire si mes résultats de plastification sont mauvais? A1 : Si vous obtenez de mauvais résultats de plastification, vous devez régler les températures. Vérifiez la température : assurez-vous que vous utilisez le réglage de température recommandé pour la plastification. Expérimentez avec différents réglages de température pour trouver le réglage optimal. Épisserie du film : utilisez une pochette de plastification dans la plage d'épaisseur recommandée (80-125 microns).

Q2 : Pourquoi de la fumée sort-elle de la machine? A2 : Il y a deux raisons possibles à la fumée : l'humidité sur les rouleaux en caoutchouc et le caoutchouc chauffant. Lorsque la machine est utilisée pour la première fois, de la fumée peut apparaître en raison de l'humidité sur les rouleaux en caoutchouc et le caoutchouc chauffant. C'est un phénomène normal qui devrait disparaître après quelques cycles de chauffage. Pochette de plastification coincée : si une pochette de plastification est coincée dans l'appareil, elle peut briser et produire de la fumée lorsque l'appareil est chauffé. Dans ce cas, il faut démonter l'appareil pour le nettoyer et retirer la pochette de plastification coincée.

Top reviews from France. Translate all reviews to English. Hervé: 'Tout à fait recommandable. Révisé en France on 24 June 2026. Modèle: A3 + 5 in-1 Set. Verified Purchase. Testé pour le moment sur du A4 70g avec des pochettes de la marque Amazon Basics et sur des cartes en 240 g avec les mêmes pochettes, je n'ai rencontré aucun souci. A savoir : la plastifieuse est livrée avec des pochettes en A5 A6 (une toute petite quantité), aussi il faudra penser à commander aussi des pochettes à plastifier en même temps. Temps de chauffe correct, ni trop long ni trop court, dépend aussi du réglage de l'épaisseur des pochettes à plastifier + plus on monte en épaisseur plus le temps de chauffe est long. Réglage de l'épaisseur simplissime (un bouton pour passer d'un réglage à l'autre). Présence d'un interrupteur général. Le massicot levé fait un peu chié mais il l'avantage d'être à (un peu chié dans le sens où la prise en main vu la taille n'est pas évidente). L'arrondissage de coins semble bien, ça déballe mais tout à fait fonctionnelle à l'usage, pas si basique que cela à l'usage : une très belle machine. Le voyant qui clignote lors de la chauffe puis qui passe au fixe dès la température à l'usage, pas si basique que cela.

torraso leone: 'Plastificatore versatile e completo, perfetto per casa, scuola e piccoli uffici. Révisé en Italy on 27 June 2025. Modèle: A3 + 5 in-1 Set. Verified Purchase. Ho acquistato il Bonsai L318-A principalmente per progetti scolastici e per organizzare documenti personali, e sono rimasto davvero soddisfatto. È molto più di un semplice plastificatore: l'inclusione di accessori utili lo rende un vero e proprio kit completo. PRO: Formato A3: un grande vantaggio rispetto ai classici A4, perché permette di plastificare documenti di diverse dimensioni (inclusi manifesti, foto, menu, ecc.). 5 in 1: oltre alla funzione di plastificazione, include taglierina integrata, arronditore angoli e 30 pettole in omaggio (A5 e A6) - tutto ciò che serve per iniziare subito. Riciclabile: rapido, in circa 3-4 minuti è pronto all'uso. Read more. Translate review to English.
