DevTerm R-01

The World's First 64-bit RISC-V Portable Terminal for Every Free Dev

Available Now

Powered by RISC-V

Note: DevTerm R-01 is a highly experimental model and requires basic experience with Linux system & FOSS.
RISC-V is an open standard instruction set architecture (ISA) that began in 2010 and is based on advanced but restricted instruction set computer (RISC) principles.
RISC-V is provided under open source license. Learn more at <https://riscv.org/>.
