GEO Zones for Airports

GEO Zones FAQ

## Airport GEO Zones

To ensure public airspace safety, DJI sets GEO Zones around airports to regulate UAV flights.

### Design for High Risk Airport

### Design for Medium Risk Airport

### Design for Low Risk Airport

\*Because environments and safety concerns may vary, airports are classified according to three risk categories: high, medium, and low.

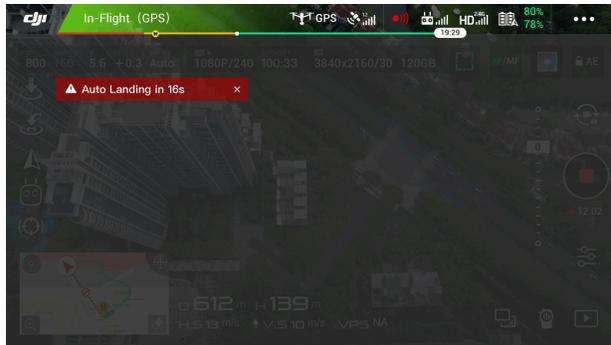

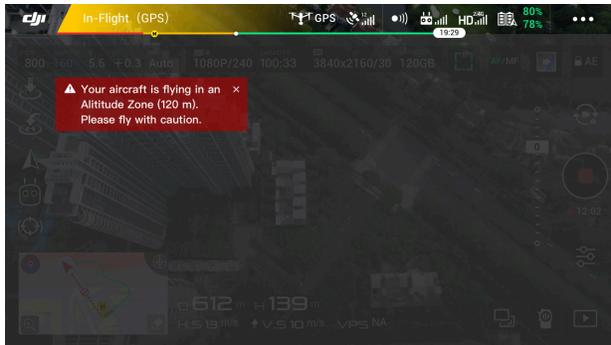

Restricted Zone

No flight whatsoever is permitted inside a Restricted Zone. These zones cover airport runways in a rectangular shape that is 1.2 km wide and the length of the runway with 3 km added to each end.
