

MAC MAC PRO

# Apple discontinues the Mac Pro with no plans for future hardware

Chance Miller | Mar 26 2026 - 2:00 pm PT | 58 Comments

It's the end of an era: Apple has confirmed to 9to5Mac that the Mac Pro is being discontinued. It has been removed from Apple's website as of Thursday afternoon. The "buy" page on Apple's website for the Mac Pro now redirects to the Mac's homepage, where all references have been removed.

Apple has also confirmed to 9to5Mac that it has no plans to offer future Mac Pro hardware.

## Mac Studio is the future

The Mac Pro has lived many lives over the years. Apple released the current Mac Pro industrial design in 2019 alongside the Pro Display XDR (which was also discontinued earlier this month). That version of the Mac Pro was powered by Intel, and Apple refreshed it with the M2 Ultra chip in June 2023. It has gone without an update since then, languishing at its \$6,999 price point even as Apple debuted the M3 Ultra chip in the Mac Studio last year.

With that in mind, the Mac Studio is clearly set up to be the 'pro' desktop Mac of the future in Apple's lineup. The Mac Studio can be configured with the M3 Ultra chip and a 32-core CPU and an 80-core GPU, paired with 256GB of unified memory and 16TB of SSD storage.

With the discontinuation of Mac Pro today, Apple now sells three desktop Macs:

- 24-inch iMac with M4
- Mac mini with M4 and M4 Pro
- Mac Studio with M4 Max and M3 Ultra

And three laptops:

- MacBook Neo
- MacBook Air
- MacBook Pro

To me, this is the strongest Mac lineup in years, and perhaps the strongest Mac lineup ever. This is especially true with the recent addition of the MacBook Neo in the entry-level spot. There are options spanning dramatically different price points, configurations, and form factors.

Furthermore, with the release of macOS Tahoe 26.2 last year, Apple added a new low-latency feature that combines the performance of the Mac Studio and the Mac Pro's coffin.

Ultimately, Apple is moving away from the Mac Pro. Continuing to support the Mac Pro is a waste of resources that could be used for other Macs.

Of course, the Mac Pro is still a great computer. But the writing was on the wall for today's news.

### My favorite items

- Anker Nano II 100W USB-C PD Charger
- CardPointe 2-in-1 Wireless Charger
- Chargebee 100W USB-C PD Charger
- Bring with you 100W USB-C PD Charger
- USB-C cable that shows how fast you're charging
