Over at the Blender Artists forum, someone made a great 3D model of a Sega Saturn. I replied that I missed the Virtua Gun, used for the fun Virtua Cop 2 game, shooting at the TV set.

He then also made a great 3D model of the Virtua Gun, and he turned out to know our Amiga games from back in the days. His reply made my day... 😊😊

Hola Metin!. Muchisimas gracias a ti.
The light gun has been through some revamping and I think it looks better now, I will be posting a new render in a couple of days here along with the console, I am really happy You liked it.
As a side note, You and your games are part of the youth memories of many amigans , You are a rock star man, Thanks for chiming in
This is the final version but I still have to make some adjustments to the textures and voila! :
