Product Description

Pre-Order Information:

This is a **pre-order item**, with **release and shipping starting 12th November 2026**.

Order now to secure your unit — payment will be taken at checkout, and all pre-orders will ship as soon as stock arrives.

SNK and PLAION REPLAI team up to bring the ultimate home console back for its 35th anniversary. A celebration of bold, generational-leading hardware that set the standard for the golden age of sprite-based arcade gaming at home.

Introducing the **NEOGEO AES+ Anniversary Edition**, the legendary video game console, now reborn with its iconic high-quality design and unmistakable arcade-grade build in this limited all-white edition. The NEOGEO AES+ is a hardware-faithful reimplementation of the original Japanese machine keeping all aspects that made it an icon of the 90s, whilst adding modern features and quality-of-life improvements for the modern era of gaming.

Uncompromising gaming machine

Gameplay on the NEOGEO AES+ is not achieved through emulation - instead the console is powered by its legacy ASIC chips, re-engineered by modern standards to accurately replicate the original machine's hardware and software. The system natively plays game software from both new and old game cartridges for the most authentic retro gaming experience. Not emulation, not FPGA approximation, but true console reincarnation etched back into silicon.

Retro gaming of the future

While maintaining the original look and feel, the NEOGEO AES+ implements modern-day quality-of-life features such as low-latency HDMI display output (whilst also including the original AV output for CRT enthusiasts), DIP switches for language selection, overclocking and different display modes, and the ability to store permanent High Scores (using the included Memory Card accessory).

Arcade authenticity

The NEOGEO AES+ Anniversary Edition includes the iconic Arcade Stick (wireless) in white, a 1:1 replica of the original stick built to mirror the control panel found on SNK's legendary MVS arcade cabinets. Designed for the NEOGEO AES+, the Arcade Stick connects natively to the console via a classic 15-pin connector wireless dongle (making it backward-compatible with the original consoles from the 90s and making the original wired Arcade Sticks from the 90s forward-compatible with the NEOGEO AES+) for an unmatched arcade experience at home. This stick is the pinnacle of arcade purity with no compromises, delivering the look, feel and fast response that defined a gaming generation.

Exclusive white Metal Slug game cartridge

The NEOGEO AES+ Anniversary Edition also includes an exclusive all-white Metal Slug game cartridge to get the action started straight out of the box! Experience the explosive arcade classic that defined run-and-gun action. Blast your way through enemy bases, jungles, and deserts, rescue prisoners of war and jump into the iconic Metal Slug tank as explosive action unfolds on screen. Packed with humour, detail and pure 2D craftsmanship, Metal Slug remains one of the most beloved titles in the NEOGEO library.

KEY FEATURES

- Legendary video game console reborn
- 1:1 replica of the original console from the 90s
- Unmistakable and uncompromising arcade-grade build
- Hardware-faithful reimplementation
- No emulation - Powered by re-engineered ASIC chips
