Ivan Fioravanti @ivanfioravanti ✕

Not using Jan with Jan-V1-4B, drop you are doing and install it now! It's a gem. BTW: yes, I'm an AC Milan

Mariusz Kurman @mkurman88 ✕

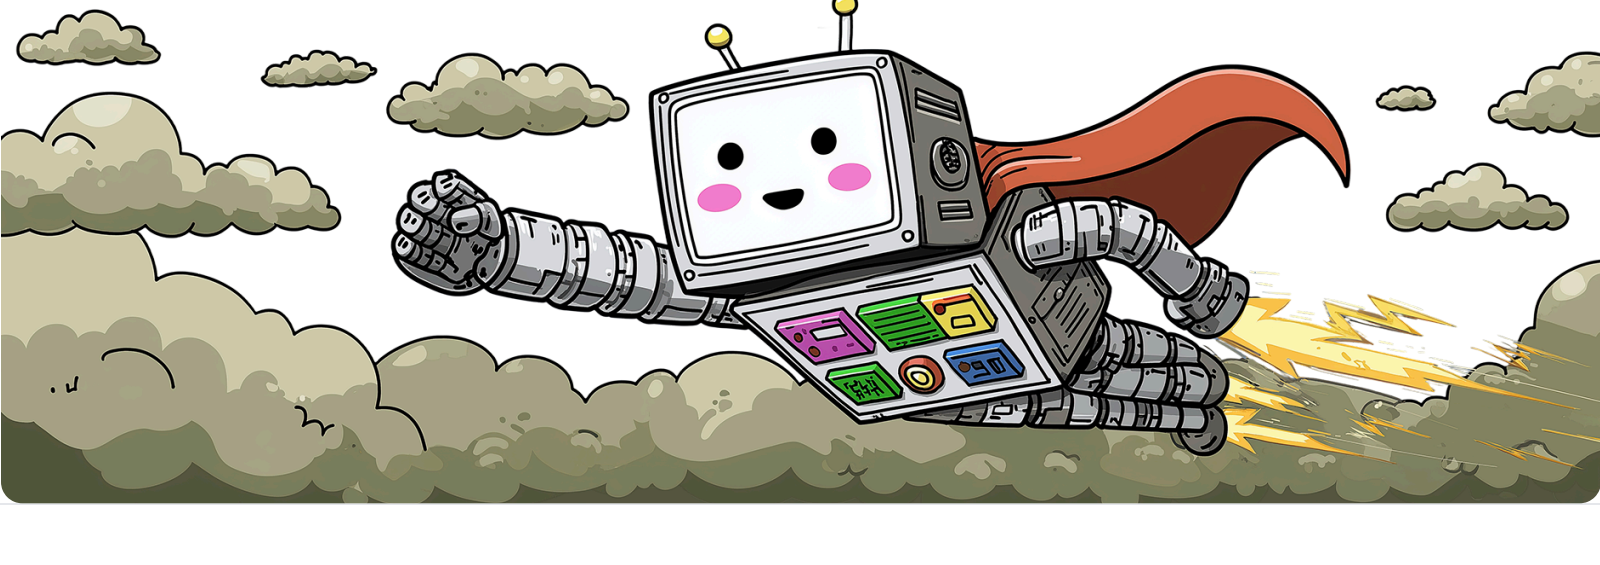

DeepJan in action: Conducting DeepResearch at home. Local models are taking the lead.

The Mandarinian @mandorlarian ✕

Jan-V1 is seriously good, Apple should consider using this to power Siri. You just don't need expensive closed models anymore for many tasks, open models have come a long way.

Anes Valentic @Matrix_Memories ✕

Jan is an amazing tool that is open source you can deploy locally. If you haven't tried already be sure to do so. Thanks goes out to the @jandotai team!

Jan
