About this item

- DIY AUTOMATIC WATERING VACATION IRRIGATION SYSTEM** - put the one end to a water source, this watering wick will suck water to the other end automatically, and drip within 15 minutes; the practical time depends on the length of the rope you cut off; make this cotton rope completely soaked in water before use then it will drip instantly. Easy to make a DIY automatic watering device system, help you care your plants while you are away from home or when you go outside or on business.
- AN ECONOMICAL & EFFECTIVE DIY SELF-WATERING WATERER** - easy to make an economic and effective self-watering waterer, NEVER WORRY that it is fragile easily break, or hard to refill, or gets clogged with soil easily, or does not hold enough water, an ideal alternative to watering cans, watering globes, glass watering bulbs, watering stake, and terracotta watering spikes. NO NEED to care the angle to plunge it into soil, or how to make it stay upright in the pots as a watering spike/globe does.
- EASY TO FIT & CONTROL & WASHABLE FOR REPEATED USE** - you can pick whatever water container, NEVER WORRY hard to find a bottle fit, especially if you can find a nice one that compliments your planter and plant. You can control the volume & time of dripping by choosing a proper water container size. The watering dripping is stable, NO WORRY that your letter get a clog and no water will come out at all or all of the water will come out at once. NO rotten, washable, can be used repeatedly.
- PRECISE & EASY WATERING HARD-TO-REACH AREAS** - the rope is flexible to adjust makes it so easy to get water to rock & soil and not all over plant with dripping, so easy to get into crowded plant areas, great at watering hard to reach spots, a perfect solution to keep the plants watered where are harder to reach.
- SIZE & 90-DAYS WARRANTY** - 50 feet long, 1/4 inch diameter. Replacement or refund shall be covered. It is perfect for DIY self-watering device, self-watering drip irrigation waterer, indoor plant watering device system, vacation plan waterer, vacation plant treatment, vacation plant watering device system and automatic system for plants, automatic watering dripper kit and self-watering planter pot.

Product Description

Orimeric Self-Watering Wick Cord
 Perfect DIY Self-watering device for vacation, busy gardeners & lazy summer days

Orimeric Self-Watering Wick Cord

- 15m in length, 6mm in diameter.
- It is washable and can be used permanently.
- It will transport water from one end to the other automatically.
- Made of polyester-mixed capillary fiber that's water not or decays for permanent use.
- It is flexible to adjust makes it so easy to get water to root & soil and not all over plant, great for all plants where you want to water the soil and keep the leaves dry.

DIY Bottom Self-Watering System
 To save excess water to allow in the bottom reservoir and provide to the plants as needed: no worry too moist or too much water for your plants.

- Perfect for the plants that need a moist growing environment
- It will transport water from one end to the other automatically.
- Keep your plants watered & alive while you are on vacation or business

Watering plants while you're away
 To save excess water to allow in the bottom reservoir and provide to the plants as needed: no worry too moist or too much water for your plants.
 Works great for watering plants using a large plastic bottle. No under watering! Can leave for a few days and your plants will be fine! Very handy! Wish I had used this method sooner!

Self watering system for outdoor plants
 Size: 150 Feet [Verified Purchase](#)
 Size: 150 feet (1/4 inch)

After a lot of research I decided to buy ORIMERIC 150 feet 1/4 inch self-watering cords. I needed something to take care of my vegetable plants and herbs while we were away for three weeks in the summer. I used several tips from other reviewers that I feel are imperative to ensure proper watering.

- Weights that will keep cords submerged
- Large enough buckets for water (depending on how long you plan to be away and how much water each plant will need)

Good investment to prevent plants from dying out.
 Size: 100 Feet [Verified Purchase](#)
 It does the job well to keep plants watered in a big and deep planter. Must read instructions carefully

Saved my plants
 I travel a lot and watering the plants has always been a concern in my absence. I have used this for over 5-7 days and its never disappointed. I have used it for almost 3 weeks of my absence but I came back to all my plants in perfect condition. Thank you.

Meh!
 Size: 100 Feet [Verified Purchase](#)
 Nothing wrong with the product! Good quality robot! But if you're planning to use this for self-watering plants then don't! It isn't working well. Would not recommend it if you're planning to use it for that.

Consejo desmoldado.
 Size: 50 Feet [Verified Purchase](#)
 Función perfectamente. Lo he utilizado con botellas de 1.5 litros. Si colocas la botella con la mecha encima de la tierra vacía la botella en 1 día y si pones la botella en el suelo, va más lento pero así se vaocio bastante rápido. No lo voy apro para asegurarla durante una o dos semanas. La mecha es muy gordita y también que por eso no se va demasiado rápido, voy a probar con una mecha de 3 mm y si el agua se va demasiado rápido. He probado con un depósito de agua debajo de la tierra. La mecha extra la agua y sube dentro de la tierra. También moja bastante la tierra con esta mecha.
