BML

[Moules] post using the [Bouchot](#) Markup Language to format [Posts](#) body.

bigorno

Bigorno is way to hail someone by adding a [LESS-THAN-SIGN](#) [↗](#):

Dave< how **are** you?

[Coincoins](#) SHOULD hail user when a [post](#) is received with his bigorno.

duck

User can post an ascii art left or right ducks:

```
\_o< \_o<  >o_/
```

Ducks can have the following character as head:

```
o00ô°øòó@
```

[Coincoins](#) MAY use ducks in [hunt](#).

[norloge](#)

[Coincoins](#) SHOULD use norloges to display links or navigate between [posts](#).

tags

Tags are html like formatting markup:

- without attribute
- without space

[Coincoins](#) SHOULD use tags to format [posts](#).

b

Same as [html5 b tag](#) [↗](#).

i

Same as [html5 i tag](#) [↗](#).

u
